Question # 12

What is GPSD in accounting?

Answer:-

GPSD is a service daemon that monitors one or more GPSes or AIS receivers attached to a host computer through serial or USB ports, making all data on the location/course/velocity of the sensors available to be queried on TCP port 2947 of the host computer. With gpsd, multiple location-aware client applications (such as navigational and wardriving software) can share access to receivers without contention or loss of data. Also, gpsd responds to queries with a format that is substantially easier to parse than the NMEA 0183 emitted by most GPSes. The GPSD distribution includes a linkable C service library, a C++ wrapper class, and a Python module that developers of gpsd-aware applications can use to encapsulate all communication with GPSD.

Besides GPSD itself, the project provides auxiliary tools for diagnostic monitoring and profiling of receivers and feeding location-aware applications GPS/AIS logs for diagnostic purposes.

Question # 13

What is the difference between forecast and budget?

Answer:-

A Budget is a plan that outlines an organization's financial and operational goals. So a budget may be thought of as an action plan; planning a budget helps a business allocate resources, evaluate performance, and formulate plans.

Forecast: Due to some operational reasons or management decision a plan may not be followed as it was done in the beginning of the year. So this is changed accordingly to comply with the organization's objectives. This change in plan is called forecast.

Question # 15

Do you know Variance Analysis with Example?

Answer:-

Variance analysis in budgeting or management accounting in general is a tool of budgetary control by evaluation of performance by means of variance between budgeted amount, planned amount or standard amt and the actual amt incurred/sold.

Variance can be carried out for both revenue & cost. Variance analysis helps the management to know the present cost & then control the future cost.

Examples includes sale price variance, sales quantity variance, sales mix variance.

Question # 16

Tell me how to prepare funds flow statement?

Answer:-

A fund flow statement or a cash flow statement records the changes in monetary funds over a period of time, usually by comparing the latest position at balance sheet date with the corresponding monetary position a year ago.

There are various elements of business that affect fund/cash flow. These include such things as increased sales, reductions or increases in debtors, longer or shorter times in paying creditors, repayments of loans, etc., a summary of which should be shown on separate lines of the statement. It can start with a section listing the elements that contribute to an increase in cash, then the next section lists those items which have contributed to a decrease in cash.

Space (and time!) does not permit more comprehensive details of what is needed and how to do it. You should consult a text book on Financial Accounting and look at the fund/cash flow statement of a company similar to the one for which you wish to prepare such a statement.

At the end of the fund/cash flow statement, if you have done all your calculations correctly, and taken everything that affects cash movement into account, your final figure will equal the cash figure in the balance sheet.

Question # 17

What is forecasting and Budget?

Answer:-

Forecasting is done based on the past experiences of the persons in the particular field and predict the cost involved for the particular action or for the data collected about the a project in the past it is done on based of past data.

[Read More Answers.](#)

Question # 18

Tell me why we cannot depreciate stock?

Answer:-

Depreciation is charged only on fixed assets because we are allocating the total expense of Fixed asset for many years.

Stock is a current asset generally used to sell with in a year only.

More importantly we show consumption of stock in Trading A/c through Cost of goods sold.

(i.e., Opening stock + Purchase - Closing Stock)

That means Stock consumption expenses is already booked in Trading A/c hence we do not show again as expense by treating as depreciation.

[Read More Answers.](#)

Question # 19

What is Asset Accounting?

Answer:-

dep is the decreasing the value of assets

[Read More Answers.](#)
