### Question # 2

If we remove the hd of a pc whether it will run or not? If yes how or if no why?

#### Answer:-

Well that depends on a lot of variables. One is temperature. As you know, temp is variable with location and the time of year. Therefore it is important that you pick the location and its variables. Also some of the physical may alter the results. In particular Astronomical Unit  $1.496 \times 10^{11}$  meters the Atomic Mass Constant  $1.6605386 \times 10^{-27}$  kg, mass of the proton  $1.67262171 \times 10^{-27}$  kg, mass of the neutron  $1.67492728 \times 10^{-27}$  kg and mass of the electron  $9.1093826 \times 10^{-31}$  kg. All these taken together along with the speed of light  $9.4605 \times 10^{15}$  m and the parsec value  $3.0857 \times 10^{16}$  m will determine the answer to your question.

### **Question # 9**

What is length of IRON PILLAR at MEHRAULI?

**Answer:-**

Firstly the question is wrong, because the pillar has a cylindrical shape. And cylinder has only height and radius. So if we answer the question according to geometry, the length of Pillar is 0(zero)inch.

And the height of pillar is 23 feet and 8 inches, and weight= 6 tonnes.
