Question # 18

What are the things essential to have for bug tracking software?

Answer:-

For a bug tracking software it is essential to have:
* Reporting facility - complete with fields that will let you provide information about the bug, environment, module, severity, screenshots etc.
* Assigning - What good is a bug when all you can do is find it and keep it to yourself, right?
* Progressing through the life cycle stages - Workflow
* History/work log/comments
* Reports - graphs or charts
* Storage and retrieval - Every entity in a testing process needs to be uniquely identifiable, the same rule applies to bugs too. So, a bug tracking tool must provide a way to have an ID, which can be used to store, retrieve and organize bug information.
