* Education
* Certifications
* Experience
* Equipment

Computer Technician Interview Questions And Answers

Question # 16

How would you get formal computer training?

Answer:-

You can begin preparing to become a computer technician while still in high school. Many high schools offer certification training courses or credit towards a 2-year college degree or an Associate's degree. High school graduates can choose to pursue either a 2 or 4 years college program and many community colleges offer computer technician training programs that focus on jobs found in the real world. The most important training courses you will need to take are those courses that prepare you for your certification exams. These courses can be taken as part of a degree program or on a stand-alone basis.

Question # 17

What experience does a computer technician need?

Answer:-

Experience in computer repair and networking is a common requirement for a computer technician. Repairing a computer or small network typically involves substantial troubleshooting skill, and many employers seek a balance of academic study with experience in curing computer ailments.

Question # 18

What clients or sectors have you worked with in the past?

Answer:-

Technicians can work in any industrial sector but it is natural for a technician to work with a limited category of customers. So just talk about yourself and try to provide information relevant to the interview. Describe your job in general (hardware store and repair shop, IT companies, etc.). List a few specific tasks you usually do, such as visiting private homes to repair minor problems on the spot, or installing and maintaining software and hardware security in the companies of a specific district.

Question # 19

How important are interpersonal skills to the computer technician?

Answer:-

Technicians are usually very good at quickly understanding any client, whether scientists or laymen and being able to effectively communicate whatever the client needs to know about the problem and its solution.

Question # 20

Do you have experience working with computer systems?

Answer:-

Private clients usually have single separate computers to troubleshoot. Larger companies usually have computer networks on their premises. It requires a special sort of expertise to know how to handle interconnected systems. It might take some research and understanding of the specific companies' infrastructure and information technology needs.

Question # 21

What are day to day tasks of a computer technician?

Answer:-

Day to day tasks would include:
* Installing new IT systems.
* Upgrading existing hardware and software.
* Visiting home users to set up their PCs or fix faulty equipment.
* Testing systems to make sure that they are working properly.
* Servicing printers, scanners and other office equipment (known as peripherals).
* Preparing cost estimates for new installations.
* Carrying out routine administration, like organizing staff rotas.

Question # 22

Why should you know to remove tough viruses?

Answer:-

You need to be able to remove tough viruses like Antivirus2009 (without formatting) and understand how to use tools like Combofix, SmitFraudFix, Autoruns, Process Explorer, Malwarebytes, Superantispyware and UBCD4Win.

Question # 23

What personal characteristics make you a valuable candidate for the position of a computer technician?

Answer:-

Computer technicians are expected to be disciplined and dedicated troubleshooters with a broad and deep knowledge of information technology maintenance. Technicians are able to work in different environments, from private homes to computerized corporations. Good computer technicians are polite and have strong work ethics and integrity when handling a client's property.

Read More Answers.

Question # 24

What are the equipment does a computer technician need to perform his/her job?

Answer:-

Many tools are needed to perform this job. A computer technician will typically need an anti-static wrist strap, power supply tester, cable crimping tool, cable tester and a variety of screwdrivers. There are several software-based troubleshooting tools offered in this field which may require a subscription for professional use. Storage devices such as an external hard drive or large USB drives often prove invaluable. Other tools may be required within specific positions and they may be listed in the job notice.

Read More Answers.

Question # 25

What education does a computer technician need?

Answer:-

Computer technician positions may require or prefer a degree in computer information services or a similar degree. Network administration or electrical engineering are also common degree paths for this profession. While a bachelor's degree is preferable, you may find employment with an associate's degree and demonstrated acumen and experience. Continuing education may also been required within your specialization.

Question # 28

How to format a computer and understand windows licensing?

Answer:-

Formatting a computer is a fairly common task for most computer technicians but its a little more than just sticking in the Windows CD during boot time and installing. You also need to know the differences between OEM, Retail, Branded, Home, Professional, Volume and Corporate Licenses.

Read More Answers.

Question # 29

Why should you have general hardware understanding?

Answer:-

This is a fairly large topic but the essentials to know is understand the power supply wattage's and voltages:
* Have an understanding of motherboard and CPU socket types.
* Understand different RAM types and speeds.
* Understand motherboard slot types (AGP, PCI, PCI-E etc..)
* Understand hard drive types such as IDE and SATA and understand hard drive jumpers and their configurations.
With these skills, you need to be able to assemble a computer. I am not just talking about putting one together, but building a good one by knowing their part speeds, compatibility and possible bottlenecks.
