### **Question # 8**

How long do you want to work for us if we hire you?

#### **Answer:-**

Here being specific is probably not the best approach. You may consider responding, "I hope a very long time." Or "As long as we're both happy with my performance."

[Read More Answers.](#)

### **Question # 9**

Can you tell me a little about yourself?

#### **Answer:-**

This question seems simple, so many people fail to prepare for it, but it's crucial. Here's the deal: Don't give your complete employment (or personal) history As Control Technicia. Instead give a pitch-one that's concise and compelling and that shows exactly why you're the right fit for the job. Start off with the 2-3 specific accomplishments or experiences that you most want the interviewer to know about, then wrap up talking about how that prior experience has positioned you for this specific role.

### **Question # 11**

What are your weaknesses for Control Technicia position?

#### **Answer:-**

Try not to be too critical when answering this question. Instead, pick one of your weaknesses and try to turn it into a positive. For example, you could be a perfectionist, which means that you sometimes take longer on tasks, but you make sure that they are completed to a high quality. It is important to make a negative into a positive as it doesn't make you appear overly critical and shows you can reflect on your own performance.

### **Question # 12**

What did you like least about your last (or current) job As Control Technicia ?

#### **Answer:-**

Don't vent or focus on the negative with brutally honest answers such as "My boss was a jerk," or "The company culture was too politically correct," or "They just weren't giving me the opportunity to take my career to the next level." Instead, keep the emphasis on the positive, even though there are sure to be things you weren't happy about.

**Question # 55**

How many square feet of pizza are eaten in the United States each month?

### **Answer:-**

This is a classic guesstimate question where you need to think aloud. And so first off you round the U.S. population to 300 million people (it's actually about 315 million but rounding will be much easier and your interviewer will not score you lower for rounding). Then estimate how many people eat pizza. A decent educated guess is two out of every three people, or 200 million. Now let's say the average pizza-eating person eats pizza twice a month, and eats two slices at a time. That's four slices a month. If the average slice of pizza is perhaps six inches at the base and 10 inches long, then the slice is 30 square inches of pizza. So, four pizza slices would be 120 square inches (30 times 4).

Since one square foot equals 144 square inches (12 times 12), let's assume that each person who eats pizza eats one square foot per month. Since there are 200 million pizza-eating Americans, 200 million square feet of pizza are consumed in the U.S. each month. To summarize: 300 million people in America, 200 million eat pizza, average slice of pizza is six inches at the base and 10 inches long or 30 square inches, average American eats four slices of pizza a month, four pieces times 30 square inches equals 120 square inches (one square foot is 144 square inches), so let's assume one square foot per person, and thus one square foot times 200 million people equals 200 million square feet of pizza a month.
