ERRORS Job Interview Preparation Guide.

Question # 1

TNS-00550: disconnection error?

Answer:-

Cause: The SSL protocol adapter encountered an error when the underlying transport disconnected.

Action: This error is not normally visible to users. Enable Oracle Net tracing and attempt to reproduce the error. If it occurs, contact Oracle customer support.

Please add more information about this Error

[Read More Answers.](#)

Question # 2

TNS-00541: underlying transport does not exist?

Answer:-

Cause: The SSL protocol adapter was unable to locate an adapter for the protocol that it is going to use as the data transport.

Action: In most cases, the underlying transport is TCP. Make sure that the Oracle Net TCP/IP adapter was installed.

Please add more information about this Error

[Read More Answers.](#)

Question # 3

NZE-29226: No matching private key found?

Answer:-

Cause: Could not locate a matching private key in the persona for the given certificate (public key).

Action: none

Please add more information about this Error

[Read More Answers.](#)

Question # 4

NZE-29193: no CRL found using CRLDP mechanism?

Answer:-

Cause: A CRL could not be fetched using CRL Distribution point (CRLDP)

Action: Discuss with CA

Please add more information about this Error

[Read More Answers.](#)

Question # 5

What is the large sustained error signal that eventually causes the controller output to drive to its limit?

Answer:-

reset windup

[Read More Answers.](#)

Question # 6

What is the error in the following code:

```
main()
{
int i=400,j;
j=(i*i)/i;
}
```

Answer:-

it is not having return statement

```
main()
{
int i=400,j;
j=(i*i)/i;
return 0;
}
```

Question # 7

What is difference between c/c++ programing language?
What is necessity of c++ when existing c programing language?

Answer:-

The main reason is lengthy C programs lose "Global View" and become very difficult to visualize as a single concept.
C++ is an advance than C lang which has more features...

But comparing efficiency C is more efficient than C++
But C++ has more flexibility than C.
Also C++ is both combination of OOP and OBP concepts.

C++ has more features as

- 1.Object oriented
- 2.Information hiding
- 3.Standard Template Library
- 4.Inheritance
- 5.Constructors & Destructors
- 6.Exception Handling
- 7.Overloading

[Read More Answers.](#)

Question # 8

What is exceptions?

Answer:-

An exception is an event, which occurs during the execution of a program, that disrupts the normal flow of the program's instructions.

[Read More Answers.](#)

Question # 9

NZE-29222: Distinguished name does not match?

Answer:-

Cause: Distinguished name (DN) on certificate doesn't match user.

Action: Create the global user in the database with the DN that matches with the one in the user certificate on the client side.

Please add more information about this Error

[Read More Answers.](#)

Question # 10

What is macro in c?

Difference between single linked list & double linked list

What is fifo & lifo?

What is stack & queue?

Answer:-

Macros are preprocessor directives that are defined using #define directive. Macros consist of two parts Macro_Name, & Macro_Substitution_Text.

Before the source code gets compiled, the preprocessor will check for the presence of macros. & wherever it found that macro simply replaces that macros with substitution text.

Macros are not Type Safe.

[Read More Answers.](#)

Question # 11

TNS-00551: underlying transport connection failed?

Answer:-

Cause: The underlying transport adapter used by the SSL adapter failed to connect.

Action: Enable Oracle Net tracing and try the connection again. If the connection fails, examine the trace file to determine the cause.

Please add more information about this Error

[Read More Answers.](#)

Question # 12

TNS-00545: parameter retrieval failure?

Answer:-

Cause: The SSL protocol adapter was not able to retrieve a configuration parameter for some reason.

Action: This error is not normally visible to users. Enable Oracle Net tracing and attempt to reproduce the error. If it occurs, contact Oracle customer support.

Please add more information about this Error

[Read More Answers.](#)

Question # 13

TNS-00543: internal error?

Answer:-

Cause: The SSL protocol adapter encountered an unexpected error.

Action: This error is not normally visible to users. Enable Oracle Net tracing and attempt to reproduce the error. If it occurs, contact Oracle customer support.

Please add more information about this Error

[Read More Answers.](#)

Question # 14

TNS-00542: SSL Handshake failed?

Answer:-

Cause: The SSL protocol adapter was unable to connect to another process.

Action: This error can be caused by a variety of problems including the termination of the peer process. Enable Oracle Net tracing and attempt the connection again. The trace file should give some clues as to what the exact problem is.

Please add more information about this Error

[Read More Answers.](#)

Question # 15

NZE-29228: Cannot calculate the number of bytes for output.?

Answer:-

Cause: The cryptographic engine is confused about the algorithm.

Action: Check the parameters being used with the cryptographic functions.

Please add more information about this Error

[Read More Answers.](#)

Question # 16

NZE-29224: Cannot locate matching certificate request?

Answer:-

Cause: No matching certificate request for the certificate was found.

Action: Install the correct certificate if there is one.

Please add more information about this Error

[Read More Answers.](#)

Question # 17

NZE-29192: Validation mechanism not set in OID?

Answer:-

Cause: The validation mechanism to be used is not set in OID

Action: Set validation mechanism to be used in OID at cn=ValidationMechanism, cn=Validation, cn=PKI, cn=Products, cn=OracleContext

Please add more information about this Error

[Read More Answers.](#)

Question # 18

NZE-29190: Multiple entries in OID?

Answer:-

Cause: For a given issuer name there should be only one CRL in OID

Action: Make sure there is only one CRL for a given issuer name in OID

Please add more information about this Error

[Read More Answers.](#)

Question # 19

What is Difference Between Server.Response and Response.Redirect in ASP.Net with C#?

Answer:-

The data transferring between two page will be more differ on server.Transfer() and Response.Redirect().

Server.Transfer

Server.Transfer() helps the one less round trip. The main advantage of this transfer the first page to second page with better performance. The data can pass through variables, query string and also can retrieve from the previous page control value.

Eg: Server.Transfer("Default.aspx");

Response.Redirect()

It is very similar to server.Transfer. The main difference is the posted previous page values can't be accessible. Here also the data can pass through server variables and query string. It simply redirect the page from one page to another.

Eg: Response.Redirect("Default.aspx")

Note: But the previous page values can't be accessible by Response.Redirect().

Question # 20

When i open the data base the data base gives error as initializing or terminating how i log into data base?

Answer:-

just wait for a few seconds and then try

its

Database initializing or shutdown in process

[Read More Answers.](#)

Question # 21

TNS-00546: control failure?

Answer:-

Cause: The SSL protocol adapter was unable to perform a command.

Action: This error is not normally visible to users. Enable Oracle Net tracing and attempt to reproduce the error. If it occurs, contact Oracle customer support.

Please add more information about this Error

[Read More Answers.](#)

Question # 22

TNS-00540: SSL protocol adapter failure?

Answer:-

Cause: The SSL protocol adapter encountered an error.

Action: In most cases, this error should only be pair with a more meaningful ORA- error.

Please add more information about this Error

[Read More Answers.](#)

Question # 23

NZE-29225: Certificate already installed?

Answer:-

Cause: Attempting to install a certificate into a persona which already has it.

Action: Do not install the certificate.

Please add more information about this Error

[Read More Answers.](#)

Question # 24

NZE-29194: no CRL found in cache?

Answer:-

Cause: CRL not in cache

Action: none

Please add more information about this Error

[Read More Answers.](#)

Question # 25

NZE-29191: OID connection information not set?

Answer:-

Cause: To connect to OID the connection information must be available

Action: Set the OID connection info
Please add more information about this Error

[Read More Answers.](#)

Question # 26

TNS-00548: value specified for client authentication parameter is not Boolean?

Answer:-

Cause: The value specified for the parameter that specifies that SSL client authentication is to be used was not boolean.

Action: Specify a correct value for the parameter.
Please add more information about this Error

[Read More Answers.](#)

Question # 27

TNS-00539: Network or Protocol services are down?

Answer:-

Cause: The Network services on or from your node are not running or have stopped running.

Action: Restart your network or protocol services on this platform. If error persists, contact Oracle Customer Support.
Please add more information about this Error

[Read More Answers.](#)

Question # 28

TNS-00537: Index into protocol adapter table is out of legal range?

Answer:-

Cause: Internal protocol adapter error.

Action: For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

Please add more information about this Error

[Read More Answers.](#)

Question # 29

NZE-29229: the magic number found in the header does not match expected?

Answer:-

Cause: The input TDU has either been corrupted or it is not being used correctly.

Action: Check that the TDU is being used from the beginning. If possible, compare the size of the TDU upon generation to the size trying to be used.

Please add more information about this Error

[Read More Answers.](#)

Question # 30

NZE-29227: Certificate is expired?

Answer:-

Cause: Certificate is no longer valid..

Action: Obtain another certificate or renew this certificate.
Please add more information about this Error

[Read More Answers.](#)

Question # 31

TNS-00552: no valid cipher suites were specified?

Answer:-

Cause: SSL cipher specs were specified, but none were valid.

Action: Specify correct cipher suites.
Please add more information about this Error

[Read More Answers.](#)

Question # 32

TNS-00549: value specified for the SSL version is not valid?

Answer:-

Cause: The value specified for the SSL version is not valid.

Action: Specify a valid value for the SSL version.

Please add more information about this Error

[Read More Answers.](#)

Question # 33

TNS-00547: user information retrieval failed?

Answer:-

Cause: The SSL protocol adapter was unable to retrieve information about the remote user.

Action: Examine the first error in the error stack. It should describe the error in more detail.

Please add more information about this Error

[Read More Answers.](#)

Question # 34

TNS-00544: unsupported operation?

Answer:-

Cause: The SSL adapter could not perform a given command.

Action: This error is not normally visible to users. Enable Oracle Net tracing and attempt to reproduce the error. If it occurs, contact Oracle customer support.

Please add more information about this Error

[Read More Answers.](#)

Question # 35

NZE-29223: Cannot create certificate chain?

Answer:-

Cause: Unable to create a certificate chain with the existing trust points for the certificate that is to be installed.

Action: Install the trust point that signed the certificate.

Please add more information about this Error

[Read More Answers.](#)

Question # 36

NZE-29195: CRL is expired?

Answer:-

Cause: CRL nextUpdate time is in the past

Action: Get a new CRL from the CA
