Finance Analyst Job Interview Preparation Guide.

Question # 1

Explain me what is working capital?

Answer:-

Working capital is defined as current assets minus current liabilities; it tells the financial statement user how much cash is tied up in the business through items such as receivables and inventories and also how much cash is going to be needed to pay off short term obligations in the next 12 months.

[Read More Answers.](#)

Question # 2

Do you know what is goodwill?

Answer:-

Goodwill is an asset that captures excess of the purchase price over fair market value of an acquired business. Let's walk through the following example: Acquirer buys Target for \$500m in cash. Target has 1 asset: PPE with book value of \$100, debt of \$50m, and equity of \$50m = book value (A-L) of \$50m.

- * Acquirer records cash decline of \$500 to finance acquisition
- * Acquirer's PP&E increases by \$100m
- * Acquirer's debt increases by \$50m
- * Acquirer records goodwill of \$450m

Absolutely. Two examples involve unsustainable improvements in working capital (a company is selling off inventory and delaying payables), and another example involves lack of revenues going forward in the pipeline

[Read More Answers.](#)

Question # 35

Tell me how do you see Greece's economy unfolding in the next few years due to their recent financial crisis?

Answer:-

If the political scenario in Greece gets stabilized with the structural reforms there is possibility of coming out of the crisis after the bail out is provided otherwise it seems difficult at the moment.

[Read More Answers.](#)

Question # 36

Suppose I buy a piece of equipment, walk me through the impact on the 3 financial statements?

Answer:-

Initially, there is no impact (income statement); cash goes down, while PP&E goes up (balance sheet), and the purchase of PP&E is a cash outflow (cash flow statement)

Over the life of the asset: depreciation reduces net income (income statement); PP&E goes down by depreciation, while retained earnings go down (balance sheet); and depreciation is added back (because it is a non-cash expense that reduced net income) in the cash from operations section (cash flow statement).

[Read More Answers.](#)

Question # 37

Explain me the single best evaluation metric for analyzing company stock?

Answer:-

There is no specific answer to this analyst interview question and hence, it is mandatory to mention a reasonable point of evaluation and explain the context for using the metrics. When you estimate a company, mention the first point as the operating margin profit as the metric. Mention that you opt for this metric because it shows

the management of the company overall apart from the basic profitability. The price earnings to growth ratio can also be mentioned as a single most complete equity valuation metric. You can give a reason that it considers projected earnings growth rate and also higher ranked commonly used price/ earnings ratio (P/E). Make sure to pick any evaluation metric that you prefer is the best. The main trick in answering this question is explaining the strength of the particular metric that you mention.

[Read More Answers.](#)

Question # 38

Tell me how do you feel about travel?

Answer:-

Accounts Receivable Impact Since accounts receivable and inventory are balance sheet items, they do not directly affect your company's income statement. Fluctuations or changes in these two current assets always appear on the balance sheet and on the cash flow statement. Revenues on the income statement show up as A/Rs or cash on the balance sheet and cash flow statement. The payment of A/Rs by customers converts A/Rs to cash, which in no way impacts the income statement. Inventory Impact As your company sells products, it reflects its inventory costs in the cost of goods sold line item on the income statement. Therefore, any fluctuations or modifications to the cost basis of that inventory will impact the income statement via the cost of goods sold. However, as with A/Rs, the cost of goods sold on the income statement already reflects inventory valuations on the balance sheet, so inventory-level fluctuations do not affect the income statement.

[Read More Answers.](#)

Question # 39

Tell me how is it possible for a company to show positive net income but go bankrupt?

Answer:-

Two examples include deterioration of working capital (i.e. increasing accounts receivable, lowering accounts payable), and financial shenanigans.

[Read More Answers.](#)

Question # 40

Tell me why should we hire you for financial analyst position?

Answer:-

For this finance related interview question, the candidate should formulate the answer by associating his skills, education, personality, and experience along with the job role. To answer this question the candidate must understand the job description and also the culture of the company. You can also show that you're a good team player by linking them with examples. When you do not possess much of skills, experience or qualification, it is important to show your energy and passion. Employers look out for charismatic people who have complete energy and confidence in their speech. And hence, it is mandatory to present yourself as a confident, motivated and energetic individual.

[Read More Answers.](#)

Question # 41

Explain me do you have experience in annual planning processes?

Answer:-

Yes, I manage the annual budget preparation process. I send out a template to each department heads requesting their budget numbers for the next fiscal year. Once I get all budget requests back, I compile the information into one document and conduct a meeting to review each budget with the CEO, CEO, director of Operations and each of the department heads. Then compile the final numbers and together with the CEO, ratify the budget.

[Read More Answers.](#)

Question # 42

Explain me what is a deferred tax liability and why might one be created?

Answer:-

Deferred tax liability is a tax expense amount reported on a company's income statement that is not actually paid to the IRS in that time period, but is expected to be paid in the future. It arises because when a company actually pays less in taxes to the IRS than they show as an expense on their income statement in a reporting period.

Differences in depreciation expense between book reporting (GAAP) and IRS reporting can lead to differences in income between the two, which ultimately leads to differences in tax expense reported in the financial statements and taxes payable to the IRS.

[Read More Answers.](#)

Question # 43

What do you know about our company and its financial matters?

Answer:-

This is a very important finance question for interview and the candidate needs to prepare for the same.
