# Geophysical Manager Job Interview Preparation Guide.

## Question # 1

What is your biggest weakness As Geophysical Manager?

### Answer:-

No one likes to answer this question because it requires a very delicate balance. You simply can't lie and say you don't have one; you can't trick the interviewer by offering up a personal weakness As Geophysical Manager that is really a strength ("Sometimes, I work too much and don't maintain a work-life balance."); and you shouldn't be so honest that you throw yourself under the bus ("I'm not a morning person so I'm working on getting to the office on time.")

### **Question # 6**

How do you prioritize your work?

#### **Answer:-**

Depends on the situation... I like to label certain tasks as either A B or C...A being the one that requires immediate attention, and C which are tasks that aren't urgent but eventually need to get done... I like to focus my work As Geophysical Manager on the things that need to get done, and done quickly... While balancing the other work alongside our first priorities.

### **Question # 7**

What have you learned from mistakes on this job?

#### **Answer:-**

Candidates without specific examples often do not seem credible. However, the example shared should be fairly inconsequential, unintentional, and a learned lesson should be gleaned from it. Moving ahead without group assistance while assigned to a group project meant to be collaborative is a good example.

Suppose there are three light switches outside a room. Inside is a single light bulb, controlled by one of the three switches. You need to determine which switch operates the bulb. You can turn the switches on and off as many times as you wish (they are all off to begin with), but may only enter the room once. There is no one there to help you. The door to the room is closed, and there are no windows, so you cannot see inside. How can you discover which switch operates the bulb?

#### **Answer:-**

Do the following steps:

\* 1. Turn ON two switches, and leave one OFF.

\* 2. Wait a few minutes.

\* 3. Turn one switch from ON to OFF. One is now ON and two are OFF

\* 4. Enter the room. - If the light is ON, it is controlled by the switch you left ON. - If the light bulb is OFF, touch it. If it is warm it is controlled by the switch you turned ON and OFF. If it is cold, it is controlled by the switch you never turned on.
