ISDN (Integrated Services Digital Network) Job Interview Preparation Guide.

Question # 1

Do you know What is the difference between Internet and ISDN and Is both are same or is there any specific difference?

Answer:-

Isdn is a type of data and internet service that makes use of digital signals running along existing copper lines to increase the data throughput, reduce line noise and enhance signal quality. Whereas, Internet is a packet-switched network of interconnected computers, enabling users to share information along multiple channels. Channels which can be made available by using ISDN for example! That makes the difference.

Question # 2

Explain the call flow in nss and what is sri signal?

Answer:-

SRI Means SEND ROUTING INFORMATION message..its is a GSM MAP PROTOCOL message..

it is initiated by GMSC (INTER CIRCLE or INTER OPERATOR)or

it can be initiated by MSC towards the HLR to get the details of routing information of the subscriber for the Mobile terminated call..

The parameters are CALLED PARTY MSISDN

CALLING PARTY MSISDN.. using this information HLR will

QUERY the destination MSC and provide the GMSC with the

MSRN number which was used for Termination
