# IT Consultant Job Interview Preparation Guide.

### Question # 1

Tell us what is the key thing about you that can give you an edge over other contenders of this position?

#### Answer:-

My exemplary time management skills, healthcare experience, 76 words per minute typing speed and, above all, 2 training courses on medical terminology, 1 on effective CRM and 2 on essentials of data management and presentations

[Read More Answers.](#)

### Question # 2

Tell us what would you include in a computer system analyst document?

#### Answer:-

Computer system analyst documents detail the operational specifications of IT systems. Candidates should list functional activities, data flows, user scenarios and interfaces between systems as part of its contents.

[Read More Answers.](#)

### Question # 3

Tell us how has your attention to detail identified a critical risk?

#### Answer:-

This question tests the candidate's attention to detail.

[Read More Answers.](#)

### Question # 4

Tell me examples of how your proactive behavior benefited past projects?

#### Answer:-

The candidate will express their proactivity skills in their answer.

[Read More Answers.](#)

### Question # 5

Tell us what technology-related blogs, podcasts or websites do you follow? Do you share any information online?

#### Answer:-

One of the must-ask IT interview questions by employers is to check whether you are staying up to date on trends. Do you have a sincere interest in IT and keep up on changes in the field and your industry? With technology rapidly changing in today's digital age, it's crucial to demonstrate your background knowledge of the IT industry during the job interview stage.

[Read More Answers.](#)

### Question # 6

Tell us what is your approach to hiring/growing a technology team?

#### Answer:-

Identify strategic objectives of the business  
Understand the skillsets that will enable attainment  
Discuss hiring versus grooming of skillset required

[Read More Answers.](#)

### Question # 7

Explain me what do you feel is most important for IT, enablement or innovation?

#### Answer:-

Depending on the industry this will differ  
Enablement: helping organizations do their core business better  
Innovation: helping organization lead with their technology

[Read More Answers.](#)

### Question # 8

Tell us do you get bored easily?

#### Answer:-

This is an interesting question, since the two extremes of possible answers may be "correct" depending on the role you're trying to fill. If you're looking to fill a strategy- or project-related role, where the candidate will be bouncing from project to project on a weekly or monthly basis, you want someone who is easily bored and constantly looking for new challenges. If you need a competent manager or staff member to run a steady-state process and sweat the details, you obviously want a very different candidate.

[Read More Answers.](#)

### Question # 9

Tell us how Is Success Measured in This Role?

#### Answer:-

How will your performance be evaluated? Will you be judged on how solid your code is or just how many lines of code you write per day? Asking how your performance will be evaluated gives you a good sense of how management understands the role. It can also give you a glimpse of corporate culture in action. If performance is based on the quality of the product, chances are company culture supports the idea of upholding quality. You can also use this answer to highlight your performance in previous positions.

[Read More Answers.](#)

### Question # 10

Tell us how do you manage triple constraints?

#### Answer:-

Provide examples on managing cost, schedule, scope

[Read More Answers.](#)

### Question # 11

Explain me how do you balance between getting into technical details versus delegating?

#### Answer:-

Identifying patterns where staff need more support and coaching them to handle exceptions  
Being available to team members on core competencies  
Providing training and development opportunities for skillset outside of the organization

[Read More Answers.](#)

### Question # 12

Tell us you've just been assigned to a project involving a new technology. How would you get started?

#### Answer:-

This question is designed to give insight into how you handle technology products with which you have less expertise. What steps have you taken to overcome a knowledge gap and ensure that you still get things done on time? IT interview questions such as these are also aimed to gauge how well you handle challenges and deal with stress.

[Read More Answers.](#)

### Question # 13

Tell us which metrics did you use to measure the progress of your last three projects?

#### Answer:-

The candidate's answer will show their ability to ensure timeframes are adhered to in a dynamic project.

[Read More Answers.](#)

### Question # 14

Tell us how have you managed a risk where the remedy was not immediately available?

#### Answer:-

This question illustrates the candidate's problem-solving ability.

[Read More Answers.](#)

### Question # 15

Explain me which processors would you recommend for a company doing data-intensive work?

#### Answer:-

This question tests the technical expertise of a candidate. He/she should note that data-intensive work requires strong computing power and should recommend an appropriate processor. He/she should be able to describe in detail the benefits and drawbacks of different processing options.

[Read More Answers.](#)

### Question # 16

Explain me a time when you made a mistake in your duties. How did you remedy the situation?

#### Answer:-

Candidates should note the importance of diligence in their consulting duties and the consequences oversight could have for business security. Look for stories where candidates erred, rectified their error and learned a valuable lesson from the experience.

[Read More Answers.](#)

### Question # 17

Explain me which communication challenges did you encounter during previous projects, and how did you overcome them?

#### Answer:-

The potential hire's response will demonstrate whether they have the ability to identify and adequately address communication challenges.

[Read More Answers.](#)

### Question # 18

Please explain about a recent project or process that you made better, faster, smarter or more efficient?

#### Answer:-

Employers today need IT professionals who understand the big-picture impact of their work. You should be able to explain how your efforts can make a difference for the employer by using concrete examples of past projects you have worked on, the challenges you overcame, and most importantly, the result you delivered for the company.

[Read More Answers.](#)

### Question # 19

Explain me what Are Some of the Challenges Someone in This Role Will Face?

#### Answer:-

You'll get a few insights if you ask this question in your IT interview. First, you'll get a good idea of how challenging the position is. It may be a role beneath your experience or expertise. You might decide to pass even if you are offered the job. On the other hand, you may be presented with a role you don't think you're cut out for.

It also gives you a chance to see more of what management expects from the person in this role. They may have said they're hiring a mobile developer, but if the interviewer's "challenges" all point to UI/UX issues, you may wonder if they understand the role. Management's understanding may be imperfect, but it can tell you a lot about the company and the expectations of the job.

[Read More Answers.](#)

### Question # 20

Explain me what are two or three major trends affecting the IT industry and how do you see them affecting the profession?

#### Answer:-

This is a big picture question, and the trends the candidate identifies are less important than the candidate's ability to identify broad industry trends and articulate their impact. Essentially, you're assessing whether candidates can think broadly about what's happening in the industry and whether they actively monitor changes in the industry.

[Read More Answers.](#)

### Question # 21

Can you explain me about a time when things didn't go the way you wanted at work, such as a project that failed or being passed over for a promotion?

#### Answer:-

Everyone deals with professional disappointment at some point. What employers want to know is how you handle these situations. The best candidates will use setbacks as springboards toward positive changes, such as getting a certification that will help position themselves for advancement next time there's an opportunity. This question is about understanding how well you overcome challenges and you're perseverance to continue working towards a goal.

[Read More Answers.](#)

### Question # 22

Basic IT Consultant Job Interview Questions:

#### Answer:-

- \* What development tools have you used?
- \* What languages have you programmed in?
- \* What source control tools have you used?
- \* What are your technical qualifications?
- \* What do you do to maintain your technical qualifications?
- \* How did your education help prepare you for this job?
- \* How would you rate your key competencies for this job?
- \* What are your IT strengths and weaknesses?
- \* Tell me about the most recent project you worked on. What were your responsibilities?
- \* What technical skills do you possess that would benefit our company?
- \* What challenges do you think you might expect in this job if you were hired?
- \* What technical websites do you follow?
- \* What elements are necessary for a successful team and why?
- \* Tell me about the project you are most proud of, and what your contribution was.
- \* Describe your production deployment process
- \* Explain a time where you applied your technical knowledge in a practical way.

- \* What did you do to ensure quality in your deliverables?
- \* What percentage of your time do you spend unit testing?
- \* What do you expect in the solution documents you are provided?
- \* What automated-build tools or processes have you used?
- \* Would you be willing to take training or classes to improve your technical skills?
- \* What have you done to improve your technical support knowledge in the last year?

- \* What tools are most helpful to you when trouble shooting and solving a problem?
- \* Where do you see your IT career going in the next five years?

[Read More Answers.](#)

### Question # 23

Tell us how have Cyber Security breaches evolved in the past 2 years?

**Answer:-**

This tests the candidate's awareness of Cyber Security trends and new hacking techniques.

[Read More Answers.](#)

### Question # 24

Tell us how would you adapt to a client's business needs?

**Answer:-**

Candidates should outline the steps they take to adapt to the needs of their clients, including learning how to understand and navigate company culture and communicating with all levels of company employees to build meaningful relationships with them and create a more comfortable working environment.

[Read More Answers.](#)

### Question # 25

Explain me how would you make staff aware of a complex technical issue that poses a risk?

**Answer:-**

This question tests the candidate's ability to communicate about a complex technical matter in a simplified form.

[Read More Answers.](#)

### Question # 26

Tell us what three character traits would your friends use to describe you?

**Answer:-**

While not technical, this question can clue the employer into your personality characteristics or qualities that may not be apparent through the resume or IT interview questions. Make sure you have a list of character traits that you believe you can demonstrate in the role you're applying for. If you're unsure about what those traits may be, ask a friend who may work in the same industry or a former colleague if they can share some insight into what they believe are positive traits that you can contribute to a company.

[Read More Answers.](#)

### Question # 27

Explain me what is the role you feel technology plays in our industry?

**Answer:-**

Healthcare: privacy, security, interconnectivity, and patient outcomes

Mining: safety and environmental management

Finance: regulatory compliance, availability, and performance

Manufacturing: driving automation excellence, minimizing material waste, reducing in-flight inventory

[Read More Answers.](#)

### Question # 28

Tell us what are your approaches to managing technology change?

**Answer:-**

Ask stakeholders how they want change to happen

Negotiate with stakeholders on competing priorities

Tell them change is happening

Prepare them for the change

Make the change happen

Communicate that change has occurred

[Read More Answers.](#)

### Question # 29

Tell us what Should the Person in This Role Accomplish in the First Year?

**Answer:-**

This question is great because it shows you're thinking ahead and about what you could contribute to the company should you be hired. It also provides another opportunity to assess the company's culture and management's understanding of the role they're hiring for.

[Read More Answers.](#)

### Question # 30

Do you know what are the five V's of Big Data?

#### Answer:-

The five V's of Big data is as follows:

- \* Volume - Volume represents the volume i.e. amount of data that is growing at a high rate i.e. data volume in Petabytes
- \* Velocity - Velocity is the rate at which data grows. Social media contributes a major role in the velocity of growing data.
- \* Variety - Variety refers to the different data types i.e. various data formats like text, audios, videos, etc.
- \* Veracity - Veracity refers to the uncertainty of available data. Veracity arises due to the high volume of data that brings incompleteness and inconsistency.
- \* Value - Value refers to turning data into value. By turning accessed big data into values, businesses may generate revenue.

[Read More Answers.](#)

### Question # 31

Suppose a user has trouble understanding what it is he's doing wrong. What do you do?

#### Answer:-

Beyond repairing and replacing, IT Technicians are required to be expert communicators and attentive to user needs. In situations like the one above, candidates should demonstrate patience and try to distill a technical problem into consumable advice.

[Read More Answers.](#)

### Question # 32

Tell us what methods do you follow when you have identified a risk to the network?

#### Answer:-

This question tests the ability of the candidate to counteract risks by implementing preventative strategies.

[Read More Answers.](#)

### Question # 33

Explain me what are your favorite and least favorite technology products, and why?

#### Answer:-

In addition to learning more about whether you like the products you use at your company, this question helps employers gauge your enthusiasm and knowledge. Do you get animated when discussing the benefits of certain tools? Do you seem to have a solid grasp of the positive and negative features of different technologies?

[Read More Answers.](#)

### Question # 34

Do you know about the Company Culture?

#### Answer:-

Every company has a culture just like every person has a personality. You won't get along with everyone, and not every company's culture will be a good fit for you. Many companies have demanding cultures. This can be particularly true in IT departments, where deadlines can be tight, expectations sky-high, and workloads heavy.

Asking about the company culture can give you a good idea of whether or not you want to work with this particular employer. It may look great from the outside, but it might not be right for you. Consider the interviewer's response carefully.

[Read More Answers.](#)

### Question # 35

Tell us what is the most innovative change you have brought to a company's IT operations?

#### Answer:-

IT Technicians are often required to solve a technical problem by introducing or recommending new technology to the company. Candidates should describe how they identified a problem and brought in innovative technology that made a significant impact in the company's technical operations.

[Read More Answers.](#)

### Question # 36

Do you know what is the process of sub-netting?

#### Answer:-

This question tests a candidate's systems analysis expertise. Candidates should describe sub-netting as a process of splitting up a single TCP/IP network into a number of unique network segments. Look for answers detailing the benefits and drawbacks of the two network structures.

[Read More Answers.](#)

### Question # 37

Tell us what is your approach to prioritizing projects?

#### Answer:-

Discuss the need to balance projects that are innovative versus scaling or structuring enterprise processes  
Utilize business case and how to determine big technology bets to drive innovation

[Read More Answers.](#)

### Question # 38

Explain me what is your experience with cloud enablement?

**Answer:-**

Discuss the common pathways to cloud including low risk back office systems to production environments  
Identify the need to negotiate licensing and subscription agreements

[Read More Answers.](#)

**Question # 39**

Explain me what, in your opinion, is the most important quality in an IT Consultant?

**Answer:-**

Candidates should list attention to detail, creative approaches to problem-solving and good organizational skills as key attributes in an IT Consultant.

[Read More Answers.](#)

**Question # 40**

As you know IT is an ever-evolving field. How do you keep up with it?

**Answer:-**

IT Technicians should always be aware of the technological advances in computing power, security and software and should be able to identify new technology that could improve company operations. Candidates should describe how they stay abreast of technological trends, including reading blogs and furthering their technical education.

[Read More Answers.](#)

**Question # 41**

Can you explain me how do you keep your technology skills current?

**Answer:-**

Have you taken online classes, or do you spend some of your spare time coding or troubleshooting technology issues? Have you taken on work projects in areas of tech that you wanted to learn more about? These IT interview questions are designed to explore how actively you're involved in the IT industry and whether your interest could contribute to the role on offer.

[Read More Answers.](#)

**Question # 42**

Tell us how did you keep your team motivated during past projects?

**Answer:-**

The candidate's answer will demonstrate their ability to motivate the project team to reach targets, and illuminate their management style. It is important to choose a candidate with strong people skills.

[Read More Answers.](#)

**Question # 43**

Tell us what is your experience working with vendors?

**Answer:-**

Discuss need to validate claimed expertise  
Provide examples on how to manage but not hamper outside consultants

[Read More Answers.](#)

**Question # 44**

Explain me how did you close your last three projects?

**Answer:-**

Listen carefully. The potential hire's answer will demonstrate their ability to close projects effectively. Some projects fail because they aren't finished or closed properly. It is therefore important to establish whether your candidate has the drive to complete a project.

[Read More Answers.](#)

**Question # 45**

Explain your troubleshooting process. Which factors are most important?

**Answer:-**

Candidates should detail their step-by-step troubleshooting process, including collecting information from users experiencing the error, establishing a hypothesis, testing it and implementing a corrective solution. The more detail, the more effective the methodology.
