[Read More Answers.](#)

Question # 23

Explain and list out the factors that can affect the manufacturing process?

Answer:-

The factors affect the manufacturing process are

- * Supplies: A well-managed supply and inventory is very crucial in order to run manufacturing process smoothly. The manufacturers must brace themselves up and ready to overcome any unexpected delays in supplies due to weather or transportation hindrance.
- * Equipment: Equipment's are the central unit for any manufacturing plant; regular maintenance are utmost necessary to avoid a breakdown in the middle of production. Identify the means of improving the efficiency of every part of the equipment.
- * Factory Overhead: Without power supply, manufacturing is not possible. Always keep plan B ready in case of temporary power cut down.
- * Special Parts: Replacing any special spare parts with different specification may slow down your production, so before ordering any special spare parts ensure it fits your demand especially if it is imported from long distance.
- * Work Force: Human resource is equally important and plays a major role in manufacturing unit.

[Read More Answers.](#)

Question # 24

Tell me what are the approach used in manufacturing for QA?

Answer:-

For QA in manufacturing techniques used are

- * Acceptance sampling: In this testing, a random sample is picked from the batch rather than testing the whole batch.
- * Statistical process control: Through the use of control charts and data collected for the samples at the various stages of production a manufacturing product can be monitored
- * Troubleshooting studies: At the end of the line product, a trouble-shooting study can be carried out to see whether the changes in the inputs are associated with the output variables.

[Read More Answers.](#)

Question # 25

Operational and Situational Incharge Raw Material Job Interview Questions:

Answer:-

- * Imagine a batch of products that was just delivered doesn't meet specifications. How do you handle it?
- * If an order of raw materials is delayed, there may be a stop in production. How do you ensure this doesn't happen?
- * If I asked you to achieve cost savings in a limited time, what would you consider?
- * Imagine one of the departments are asking for equipment that exceeds budget claiming they really need it. How do you resolve this?
- * If a buyer or purchasing agent was consistently underperforming, what would you do?

[Read More Answers.](#)

Question # 26

Tell me when contacting supplier references, which questions should I ask that will elicit worthy information about the vendor?

Answer:-

When checking supplier references, you need to collect as much information as possible to help you make a wise decision. You should interview at least three references and engage them in conversation. Verify all the information you already have about the supplier. Find out the scope of the project and how long the contract was for.

The following are some questions that could help you make an informative decision:

- * Were you pleased with the work performed?
- * Would you do business with this supplier again?
- * How long have you been doing business with this supplier?
- * What do you like best about the work performed?
- * What do you like the least about this supplier?
- * Is there anything about the work performed that you were not happy with?
- * Was the contract completed on time?
- * Was the supplier helpful and timely when responding to your questions?
- * Were there any unexpected expenses or additional costs unrelated to change orders?
- * Were there any unexpected delays unrelated to change orders?

[Read More Answers.](#)

Question # 27

Tell me is it proper to use the term "and/or" in agreements?

Answer:-

The term "and/or" should not be used in agreements. Ambiguity arises when this term is used because of the many possible variations this term can create. It is more exact to use the terms "and" and "or" separately. The term "and" means both, the term "or" means either.

[Read More Answers.](#)

Question # 28

Explain me how would you know that the price of a customized product that you purchase from a supplier is fair?

Answer:-

While it is not easy to determine fair prices of customized products, one can look through the prices of different components that a product has used. Based on this along with tax and legal profit information, one can figure out a fair price even for customized products.

[Read More Answers.](#)

Be sure to include maintain support for mandatory activities, eliminating unnecessary processes, and prioritizing.

[Read More Answers.](#)

Question # 33

Tell me at your previous place of work, what was your role in the whole procurement process? What was you accurately responsible for?

Answer:-

My role isn't limited to one specific task in the procurement process as far as the merchandise or material handler job description is concerned. My duties cover a large spectrum of tasks including:

- * Selecting and picking finished products for shipment according to shipping labels or purchase orders, while verifying and also matching quantity mentioned on the purchase order.
- * Maintaining and verifying goods' records (received/shipped) facilitating flow of goods through the factory and the warehouse.
- * Performing cycle and location counts with a Cherry Picker material handler
- * Using Scan Guns and warehouse management system (WMS) programs like Fourth Shift and Visibar for making system adjustment entries
- * Operating material handling equipment efficiently and also following preventative maintenance programs on assigned material handling equipment

[Read More Answers.](#)

Question # 34

Tell me what is the difference between lean manufacturing and JIT (Just-in-Time) Manufacturing?

Answer:-

* Lean Manufacturing: It takes the concept of JIT and re-examines it from the customer point of view. Anything that is produced should add something of valuable to the customer's requirement. For example, if you are making stereo system for a luxury car, you will think from the customer point of view like sound quality, durability, space occupancy, loud or medium sound, etc.

* JIT (Just-in-Time): This methodology is designed to ensure that a product or part would arrive just in time to be used. This technique saves the cost behind the unused inventory, and eliminating the need of piling up inventory.

[Read More Answers.](#)

Question # 35

Explain what kind of skills and knowledge should be possessed by a material handler to work effectively?

Answer:-

A material handler should know about basic warehouse procedures. Moreover, he must possess computer, mathematical, communication and reading skills to get his job done in the most effective manner.

[Read More Answers.](#)

Answer:-

Yes, I possess a valid driver's license with a clean driving record.

[Read More Answers.](#)

Question # 45

Explain me an example of where you resolved a conflict within your team?

Answer:-

Last year we had very large consignments to ship and two members of the team who were in charge of manual scanning of the material were not working as hard and fast as they were required to. I suggested in the weekly meeting to switch some duties to enhance productivity of the team and volunteered to be shifted to manual scanning. The supervisor reallocated tasks for everyone, assigning more preferred tasks to the 2 underperforming workers which resolved the issue.

[Read More Answers.](#)

Question # 46

Explain how do purchasers find their suppliers. Are there favorite places they look?

Answer:-

A prime source for finding new suppliers is the Thomas Register. The Thomas Register lists manufacturers by product categories and geographic location. Thomas Register supplier information can be obtained online from their website (its free), a set of their cds which can be networked within a company, and their set of catalogs. Another good source for finding suppliers is through Trade Associations, most can be accessed online. Another good source is globalguideline.com and internet search engines such as google.com which can be used to search for specific products, commodities or companies.

[Read More Answers.](#)

Answer:-

Inventories represent a sizable investment for businesses. The higher the inventory turns, the lower the inventory carrying costs.

[Read More Answers.](#)

Question # 53

Explain how to decide with project needs a purchasing contract?

Answer:-

Purchasing contracts are usually needed for procurement of materials or equipment for ongoing projects. Contracts with suppliers are a surefire way of ensuring constant and controlled supplies in a timely manner. I work on contracts for larger projects that have constant procurement needs. For shorter projects, contract management is usually a waste of time.

[Read More Answers.](#)

Question # 54

Tell me what do PPE and MSDS stand for?

Answer:-

PPE stands for Personal Protection Equipment and MSDS stands for Material safety data sheet.

[Read More Answers.](#)

Question # 55

Tell me how do I calculate Inventory Turns?

Answer:-

Inventory turns is the annual cost of the inventory issued divided by the average monthly inventory value.

The average monthly inventory value is calculated by adding the past 12 monthly inventory values and dividing the total by 12. At the end of each subsequent month, add the latest month's inventory value and delete the 12th most distant monthly inventory value.

The annual cost of issues is calculated by adding the past 12 monthly cost of inventory issues. At the end of each subsequent month, add the latest month's cost of inventory issues and delete the 12th most distant month.

[Incharge Raw Material Interview Questions And Answers](#)

Example: Annual Cost of Issues/ Average Monthly Inventory Value = Inventory Turns $\$400,000/\$100,000 = 4.0$ Turns

[Read More Answers.](#)
