### **Question # 70**

What do you think is your greatest weakness?

**Answer:-**

Don't say anything that could eliminate you from consideration for the job. For instance, "I'm slow in adapting to change" is not a wise answer, since change is par for the course in most work environments. Avoid calling attention to any weakness that's one of the critical qualities the hiring manager is looking for. And don't try the old "I'm a workaholic," or "I'm a perfectionist."

**Question # 71**

What schedule do you hope to work? Are you willing to work extra hours?

**Answer:-**

Be honest. If you really want the job and are willing to work any schedule needed, say so. If, however, you have no intention of working late hours or weekends, simply let the interviewer know the hours that you are available to work. The same applies to extra hours. You are more likely to be hired if you are willing to work any time you are needed. However, saying that you are willing and then complaining about the hours once you start working is a recipe for disaster.

Give an example of a time you successfully worked As Industrial Gas Servicer on a team?

**Answer:-**

On the whole I prefer to stick to doing what I'm told rather than setting myself up to fail by doing things off my own bat. She thought it was an interesting idea but nothing ever came of it.

**Question # 74**

Are you planning to continue your studies and training As Industrial Gas Servicer?

**Answer:-**

If asked about plans for continued education, companies typically look for applicants to tie independent goals with the aims of the employer. Interviewers consistently want to see motivation to learn and improve. Continuing education shows such desires, especially when potentials display interests in academia potentially benefiting the company.

Answering in terms of "I plan on continuing my studies in the technology field," when offered a question from a technology firm makes sense. Tailor answers about continued studies specific to desired job fields. Show interest in the industry and a desire to work long-term in said industry. Keep answers short and to the point, avoiding diatribes causing candidates to appear insincere.

**Question # 76**

What do you think we could do better or differently?

**Answer:-**

This is a common one at startups. Hiring managers want to know that you not only have some background on the company, but that you're able to think critically about it and come to the table with new ideas. So, come with new ideas! What new features would you love to see? How could the company increase conversions? How could customer service be improved? You don't need to have the company's four-year strategy figured out, but do share your thoughts, and more importantly, show how your interests and expertise would lend themselves to the job.

**Question # 77**

What was the most important task you ever had?

**Answer:-**

There are two common answers to this question that do little to impress recruiters:

\* 'I got a 2.1'

\* 'I passed my driving test'

No matter how proud you are of these achievements, they don't say anything exciting about you. When you're going for a graduate job, having a degree is hardly going to make you stand out from the crowd and neither is having a driving licence, which is a requirement of many jobs.
