# Master Great Lakes Job Interview Preparation Guide.

## Question # 1

Describe a time when you put your needs aside to help a co-worker understand a task. How did you assist them? What was the result?

### Answer:-

The key is to show that the mentoring of a co-worker was first a higher priority than the task you had at hand (remember, you want to show that you focus on highest priority tasks first). Then, describe in detail how you helped them not only complete the task but learn to do it on their own. You want to teach them HOW to fish and not to simply fish for them.

### Question # 58

Give an example of a time you successfully worked As Master Great Lakes on a team?

**Answer:-**

On the whole I prefer to stick to doing what I'm told rather than setting myself up to fail by doing things off my own bat. But there was this one time when I suggested to my boss at the pizza parlor that she try offering an 'all you can eat' deal to students to boost trade on Mondays. She thought it was an interesting idea but nothing ever came of it.

### Question # 59

How many square feet of pizza are eaten in the United States each month?

**Answer:-**

This is a classic guesstimate question where you need to think aloud. And so first off you round the U.S. population to 300 million people (it's actually about 315 million but rounding will be much easier and your interviewer will not score you lower for rounding). Then estimate how many people eat pizza. A decent educated guess is two out of every three people, or 200 million. Now let's say the average pizza-eating person eats pizza twice a month, and eats two slices at a time. That's four slices a month. If the average slice of pizza is perhaps six inches at the base and 10 inches long, then the slice is 30 square inches of pizza. So, four pizza slices would be 120 square inches (30 times 4).

Since one square foot equals 144 square inches (12 times 12), let's assume that each person who eats pizza eats one square foot per month. Since there are 200 million pizza-eating Americans, 200 million square feet of pizza are consumed in the U.S. each month. To summarize: 300 million people in America, 200 million eat pizza, average slice of pizza is six inches at the base and 10 inches long or 30 square inches, average American eats four slices of pizza a month, four pieces times 30 square inches equals 120 square inches (one square foot is 144 square inches), so let's assume one square foot per person, and thus one square foot times 200 million people equals 200 million square feet of pizza a month.

### **Question # 64**

Are you planning to continue your studies and training As Master Great Lakes?

#### **Answer:-**

If asked about plans for continued education, companies typically look for applicants to tie independent goals with the aims of the employer. Interviewers consistently want to see motivation to learn and improve. Continuing education shows such desires, especially when potentials display interests in academia potentially benefiting the company.

Answering in terms of "I plan on continuing my studies in the technology field," when offered a question from a technology firm makes sense. Tailor answers about continued studies specific to desired job fields. Show interest in the industry and a desire to work long-term in said industry. Keep answers short and to the point, avoiding diatribes causing candidates to appear insincere.
