Microsoft Certification Interview Questions And Answers Guide.

Microsoft Certification Job Interview Preparation Guide.

Question # 1

You are creating a cluster continuous replication (CCR) cluster. You create a failover cluster and you install the Mailbox server role named ExchMB1 on the active node. You need to install the Mailbox server role on the passive node. What are two possible ways to achieve this goal? (Each correct answer presents a complete solution. Choose two.)
A. Run the Enable-StorageGroupCopy -Identity ExchMB1SG1 command.
B. Run the Setup /roles:Mailbox command.
C. Run the Setup /newcms /CMSname:ExchMB1 command.
D. Select the Passive Clustered Mailbox Role check box in the Exchange Server 2007 Setup

Answer:-

B. Run the Setup /roles:Mailbox command.
D. Select the Passive Clustered Mailbox Role check box in the Exchange Server 2007 Setup

Question # 2

Your Exchange Server 2007 environment is configured with cluster continuous replication (CCR). The Microsoft Windows Cluster service (MSCS) is installed on two servers named Server1 and Server2. The default cluster that runs on the MSCS cluster is named Clus1. The cluster mailbox server (CMS) is named ExchCMS1. Currently Clus1 and ExchCMS1 are running on the Server1 cluster node, and the CCR replica is running on the Server2 cluster node. You need to back up the CCR replica. In the backup application, which name should you specify?
A. Server1
B. Server2
C. ExchCMS1
D. Clus1

Answer:-

C. ExchCMS1

Question # 15

If You want to trigger an alert when the number of messages in the mailbox stores receive queue
on an Exchange Server 2007 server reaches a defined value. What counter do you select when
configuring the alert? (The question uses the notation <performance object>:<counter name>.)
A. MSExchangeIS:Messages Queued For Submission
B. MSExchangeIS:Receive Queue Size
C. MSExchangeIS Mailbox:Messages Queued For Submission
D. MSExchangeIS Mailbox:Receive Queue Size

Answer:-

D. MSExchangeIS Mailbox:Receive Queue Size

Question # 16

What does the following command do?
Set-PublicFolder OHuman ResourcesO -ReplicationSchedule "Saturday.12:00 AM -
Monday.12:00
AMO
A. Specifies that the Human Resources public folder replicates only on Saturday and Sunday.
B. Specifies that the Human Resources public folder replicates only on Saturday, Sunday, and
Monday.
C. Specifies that the Human Resources public folder replicates only on Sunday.
D. Specifies that the Human Resources public folder always uses the default replication schedule
of the public folder database.

Answer:-

A. Specifies that the Human Resources public folder replicates only on Saturday and Sunday.

Question # 17

You need to find out the total size of a users mailbox. What should you do?
A. Run the Database Troubleshooter in the Exchange Troubleshooting Assistant.
B. Run the Get-MailboxDatabase cmdlet.
.C. Run the Get-MailboxStatistics cmdlet
D. Run the Get-Mailbox cmdlet.

Answer:-

C. Run the Get-MailboxStatistics cmdlet

Question # 18

Your environment contains t he following servers:
Mailbox server named ExchMb1
Client Access server named ExchCAS1
Standby Microsoft Windows Server 2003 computer named Server2
Two Hub Transport server s named ExchHub1 and ExchHub2 ExchHub1 fails.
You need to restore ExchHub1 to its pre- failure configuration
What should you do?
A. Rename Server2 to ExchHub1, and run the Setup /m:RecoverServer command on ExchHub1.
B. Rename Server2 to ExchHub1, and run the Setup /m:lnstall /role:HT command on ExchHub1.
C. On ExchHub2, run the Setup /m:RecoverServer command.
D. On ExchHub2, run the Setup /m:lnstall /role:HT command.

Answer:-

A. Rename Server2 to ExchHub1, and run the Setup /m:RecoverServer command on ExchHub1.

Question # 19

Windows NT 4.0 is currently installed on the system you are using on an NTFS partition. You want to install Windows 2000 Professional and dual boot NT 4.0 and
2000 professional. What do you need to do?
A. Install Windows 2000 on the same folder that Windows NT is installed in
B. Install Windows 2000 on a separate partition from Windows NT 4.0
C. Upgrade Windows NT 4.0 to SP4 or later then install Windows 2000.
D. This cannot be accomplished

Answer:-

Answer: C. Upgrade Windows NT 4.0 to SP4 or later then install Windows 2000.

Question # 20

What is h-look and v-look

Answer:-

Explain your self for h-look and v-look

Question # 21

Explain Users report that they are unable to access their mailboxes on an Exchange Server 2007
computer named Exch1. You verify that connectivity to the server is functioning and that server
hardware is functioning normally. Access to global catalogs is also functioning normally. You
need to report on the status of all required Exchange-specific and Exchange-dependent services.
What should you do?
A. From the Exchange Troubleshooting Assistant, run the Database Troubleshooter.
B. Run the Test-ServiceHealth -Server Exch1 cmdlet.
C. Run the Test-SystemHealth -Server Exch1 cmdlet.

D. Run the Get-ExchangeServer-ldentityExch1 cmdlet.

Answer:-

B. Run the Test-ServiceHealth -Server Exch1 cmdlet.

Question # 22

Explain Your company normally does not allow out-of-office messages to be sent to users outside of your
Exchange 2007 organization. The company makes an exception for a business partner named
Northwind Traders. The SMTP domain for Northwind Traders is northwindtraders.com. You need
to configure your Exchange organization to allow out-of-office messages to be sent to e-mail
addresses in the northwindtraders.com domain. What should you do?
A. Add northwindtraders.com as a remote domain and set the appropriate options.
B. Add northwindtraders.com as an accepted domain and set the appropriate options.
C. Create a transport rule and set the appropriate options.
D. Create a Send connector for northwindtraders.com and set the appropriate options.

Answer:-

A. Add northwindtraders.com as a remote domain and set the appropriate options.

Question # 23

Marc is Marias assistant. Marc needs to be able to view all of the folders and subfolders in Marias
mailbox and to open and respond to Marias e-mail. You need to assign Marc the appropriate
permissions. What should you do?
A. Run the Add-ADPermission -Identity Maria User Marc AccessRights Self ExtendedRights
Send-As cmdlet.
B. Run the Add-MailboxPermission Identity Maria User Marc AccessRights ExternalAccount
cmdlet
C. Run the Add-MailboxPermission Identity Maria User Marc AccessRights FullAccess
cmdlet.
D. In the Active Directory Users and Computers management console, assign Marc the Allow-
Full Control permission for Marias user account.

Answer:-

C. Run the Add-MailboxPermission Identity Maria User Marc AccessRights FullAccess
cmdlet.

Question # 24

You need to find out if users can log on to your Mailbox server directly by using Microsoft Office
Outlook. Which cmdlet should you run on the client network?
A. Test- ServiceHealth
B. Test- SystemHealth
C. Test- MAPIConnectivity
D. Test- OutlookWebServices

Answer:-

C. Test- MAPIConnectivity

Question # 25

An Exchange Server 2007 computer name d Exch1 fails. You build a new Microsoft Windows
Server 2003 computer named Exch1 to replace the failed computer. Before you restore the
mailbox databases from backup, you need to restore the Exchange Mailbox server role on Exch1.
What should you do?
A. Restore the System State data and the Microsoft Information Store data.
B. Run the Setup /NewProvisionedServer/role:Mailbox command.
C. Run the Setup /m:lnstall /role: Mailbox command.
D. Run the Setup /m:RecoverServer command.

Answer:-

D. Run the Setup /m:RecoverServer command.

Question # 26

You need to configure your Exchange Server 2007 computer so that a specific distribution group
will allow out-of-office responses from the mailboxes of members of the distribution group. What
should you do?
A. On the distribution group properties, enable out-of-office responses to be sent to message
senders.
B. On the distribution group properties, enable delivery reports to be sent to message senders.
C. On the default remote domain policy, enable out-of-office responses.
D. Re-create the distribution group as a security group.

Answer:-

A. On the distribution group properties, enable out-of-office responses to be sent to message senders.
