Mono Framework Interview Questions And Answers Guide.

Mono Framework Job Interview Preparation Guide.

Question # 1

Tell me what is the difference between mono and .net framework?

Answer:-

Mono is a cross-platform implementation of the pieces that make up the .Net framework, like the CLR, C#/VB.Net compilers, and the base class libraries. Currently, Mono supports just about everything available in .Net 2.0. There are a few notable exceptions, like Windows.Forms' DataGridView and ASP.Net's WebParts. There are also a couple of namespaces that don't really have a Linux equivalent like EnterpriseServices, System.Management, and System.Messaging.
The .NET Framework is Microsoft's platform for building applications that have visually stunning user experiences, seamless and secure communication, and the ability to model a range of business processes. And it is Only for Windows Platforms.

Question # 2

What is mono framework architecture?

Answer:-

The major components of Mono include:
    Code Execution Engine
    Class Libraries
        Base Class Library
        .NET Compatibility Class Libraries
        Mono specific class libraries:
            Cross platform class libraries for both Mono and .NET (Gtk#, Mono.Cecil, Mono.CSharp, Text.Templating)
            Unix-specific class libraries (POSIX, Filesystem in Userspace (FUSE), curses)
            Platform-specific class libraries (bindings for: Mac, iOS, Android, MeeGo)
    CLI Assemblies
    CLI Metadata
    Mono's Common Language Runtime
        Compatible with the ECMA Common Language Infrastructure/.NET Common Language Runtime
        Mono-specific enhancements:
            Mono.SIMD support
            Mono co-routines and continuations.
    Mono-specific enhancements
    Native interop services and COM interop
    Security - Transparent Code Framework
