New Product Resource Management Job Interview Preparation Guide.

Question # 1

Tell me what is the difference between waterfall model and SDLC(system development life cycle)?

Answer:-

Waterfall model itself known as system development life cycle.
Software development life cycle is different from system
development life cycle. I.E. Waterfall model is also known
as linear sequential model or system development life cycle
model.

Question # 2

Explain What is main difference between Continuous Integration and Iterative Models?

Answer:-

Continuous integration:

First core functionality implemented. Then new requirements
are added to that implemented part and checking whether it
is giving some meaningful functionality and then again some
requirements are added. This process continues until the
system is fully developed.
Advantage: Client gets small working system very early.
Iterative: Total opposite to the above.

Disadvantage : Client has to wait a long for his/her desired
system
