### Question # 3

Can we use my Asha device as a modem from Mac OS X system?

#### Answer:-

Yes, we can use your phone to share the internet connection with our Mac either over a USB cable or via Bluetooth.

To use the phone as a USB modem, follow the steps below:

Connect your Asha phone to your Mac using a compatible USB cable. When prompted by the phone to select the USB mode, choose Modem

On the Mac go to System Preferences > Network

If your phone is not visible in the services list, click on the + button, select the phone from the Interfaces dropdown and click Create.

Select the network service corresponding to your Asha phone and click Advanced where you should make the following changes under the Modem tab:

Vendor: Nokia

Model: GPRS (GSM/3G)

APN: enter the name of the internet APN as required by your mobile operator. In many cases this is "internet" but it may vary from operator to operator.

Click Ok and then Apply

Click Connect to initiate the internet connection.

### **Question # 7**

What do you know about Nokia Asha?

### **Answer:-**

The Asha platform is a mobile operating system (OS) and computing platform designed for low-end borderline smartphones, based on software from Smarterphone which was acquired by Nokia. The platform inherits UI similarities from Symbian, Maemo and MeeGo, and replaces Series 40 on Nokia's low-end devices.

### **Question # 8**

Explain Nokia Asha OS software features?

### **Answer:-**

The Nokia Asha 306 is powered by Nokia Series S40 Full Touch operating system and comes with a variety of applications:

Web: Nokia (proxy) Browser for Series 40

Conversations: Nokia Messaging Service 3.2 (instant messaging and e-mail) and SMS, MMS

Social: Facebook, Twitter, Flickr and Orkut, Whatsapp messenger S40.

Media: Camera, Photos, Music player, Nokia Music Store (on selected market), Flash Lite 3.0 (for YouTube video), Video player

Personal Information Management: Calendar, Detailed contact information

Utilities: Notes, Calculator, To-do list, Alarm clock, Voice recorder, Stopwatch

The device comes with Nokia Maps for Series 40 and make use of cellular network for positioning as there is no GPS in the phone. Nokia Maps for Series 40 phones does not provide voice guided navigation and only allows for basic route (<10 km) to be plan. The software will provide step by step instructions, allows the user to see the route on a map and search for nearby points of interest. Depending on where the phone was purchased, regional maps (Europe, South America, etc.) are preloaded and, as such, an active internet connection to download map data is not required.
