### **Question # 7**

Tell me is Numerology based solely on my date of birth?

#### **Answer:-**

Your personal Numerology chart is primarily based on two things: your date of birth and the name you were given at birth, but also takes into account the name you use today. Some numbers and cycles in your Numerology chart are derived from your birth date while others come from the letters of your birth name. According to Numerology, the name you were first given is the perfect name for you -- the name you were truly meant to have.

### **Question # 8**

Tell me what's your favorite story where numerology has been able to really help someone through dark times?

#### **Answer:-**

A woman wanted a divorce from her husband of 25 years because he was not aggressive nor was he taking the lead in making decisions leaving them all up to her which she grew tired of. She met a man who was aggressive and exciting and decided to upgrade so she thought she would be getting a better partner. After generating their blueprints/charts, she learned that her husband had no aggressive numbers in his chart but realized he was a great provider/caregiver/lover who gave her all the freedom she wanted to run the household. In contrast, this woman had all of the aggressive numbers so in essence, she had been beating this man up all this time for something he had no control over. When I suggested that the new man might not be as great a lover and maybe even dominating and controlling, she had to take a look at her current relationship. After the reading/consultation which helped her to intellectually understand herself and her husband's behavior patterns, she realized now that she had the perfect partner who was never going to be aggressive. When she accepted that fact that she could not change her husband's traits, the decision to divorce was no longer a consideration.

### **Question # 10**

Tell me do you have a favorite version of numerology? Why does it stand out above the others?

#### **Answer:-**

The only version of Numerology that I use is known as Chaldean which is the only accurate system of numbers dating back to 4004 BCE. This system is based on sound and phonics versus the other system that is based on the alphabet and number assignment which destroy the vibrational patterns of naming. Only a few experts in the world know this, even western numerologists will tell you that they know their system lacks something but they don't know what that something is.

### **Question # 11**

Tell me what kind of answers can Numerology give?

#### **Answer:-**

Numerology is a self-help tool that can reveal much about your personal character and your life as a whole. In many ways, Numerology can both predict and not predict your future. While your Numerology cycles indicate the opportunities and challenges, joys and pains that will arise throughout different periods of your life, the way you choose to handle these occurrences at any given moment is still up to you.

### **Question # 12**

Tell me how important is numerology in your life? Can you give us an example of numerology from your day to day living?

#### **Answer:-**

Numerology is very important in our lives but most people are unaware that it even exists or the magical powers of gleaning information from the secrets that lay hidden within a name and birthdate-because it was not a part of our educational system. It's virtually impossible to live in this world without using numbers in everything we do. Numbers are a part of our existence and define our lives-even though most people are not aware of their importance or that we use numbers consciously or unconsciously.

### **Question # 13**

Tell me first of all what is your prediction on Numerology itself? How long is this fad going to last?

#### **Answer:-**

Numerology is not a fad. It is a science which is 5000 years old. It cannot come and then disappear. Though I must confess, I had popped the same question to my father too, when I did not believe in numerology. But having seen the way it works I feel it is something we should believe in and take help from. Well it is true people are flocking the RTO and the passport offices, but what is the harm? They are doing it to better their lives. People come to us and ask to suggest names for their new born babies. I think they are doing it right? It is a valuable gift they will be giving it to their children - a right name. My father, Late Mr Bansilal, who single handedly revived this age old art back in India realized, just 10 years ago, that my name should have been Sanjay B Jumani and not Sanjay.

### **Question # 14**

Tell me what's a common numerology mistake that you see less experienced numerologists make?

#### **Answer:-**

The most common mistake made by less experienced numerologists is that they don't know the rules of the game that are quite complex or even if they are using the right system of numbers to begin with. For example, most people when calculating a business name will include Inc. LLC, Corporation etc. which is a part of the name but does not apply when calculating the name. This is a financial structure only so it carries no weight in selecting the name but will indeed alter the correct vibrational pattern if calculated.

### **Question # 15**

Tell me can you help us understand the role the number 9 plays in Chaldean numerology? Why don't we see it very often?

#### **Answer:-**

Chaldean Numerology is based on the Chaldean Alphabet which assigns only "eight" root numbers (numerical values) to the sound-syllables (letters) of their alphabet. The Number "9" was considered to be sacred in and of itself. It was sacred not only because it was symbolic of the highest level of spiritual attainment, but also because its level of creative energy was higher than all numbers. Therefore the Number "9" could never be assigned to represent a single "letter" (sound-syllables). As a consequence, the Number 9 is not included in the number assignment of the letters (sound-syllables) of the Chaldean Alphabet.

### **Question # 16**

What is paranormal?

#### **Answer:-**

Paranormal events are phenomena described in popular culture, folklore, and other non-scientific bodies of knowledge, whose existence within these contexts is described to lie beyond normal experience or scientific explanation.

A paranormal phenomenon is different from hypothetical concepts such as dark matter and dark energy. Unlike paranormal phenomena, these hypothetical concepts are based on empirical observations and experimental data gained through the scientific method.

How to do numerology readings?

#### **Answer:-**

Doing numerology readings is the main activity for improving your knowledge and your skill with the subject. Provide free or paid readings. Do whatever you need to do, with integrity of course, to get willing agreements from people for you to do a reading for them.

Who was Pythagoras?

#### **Answer:-**

Pythagoras of Samos was an Ionian Greek philosopher, mathematician, and the putative founder of the movement called Pythagoreanism. Most of the information about Pythagoras was written down centuries after he lived, so very little reliable information is known about him. In 520 BC, he returned to Samos.
