Question # 7

Why bill-to and ship-to locations is mandatory for the customer?

Answer:-

Bill to is required because this is the address which is paying for our bills. Ship to is also required because if we have to send any material then to which address it should be sent to.

[Read More Answers.](#)

Question # 8

Why contracts need to group and how to assign?

Answer:-

Contracts are needed to be grouped because the renewals, terminations, extensions of the Contracts can be done easily based on their groups. The Contract be assigned to a particular group while authoring the Contract in the Summary--->Administration Tab. And also we can change the Contracts to another groups from the Contract Navigator.

Question # 10

How to create service contract manually, either with or without template?

Answer:-

If you are talking about Oracle Apps service contract, the service contract can be created by using OKS APIs. If you have a template then you can populate the inventory IDs directly from service contract base tables or else you have to use Inventory and order management tables.

[Read More Answers.](#)

Question # 11

Tell me What is the use of manual and automatic contract number creation?

Answer:-

Autonumbering functionality will automatically create contract number after creation of the contract. It provides flexibility in defining how contracts are numbered. One can manually override the system-generated number, assuming the allow manual checkbox is selected during setup.

[Read More Answers.](#)

Question # 12

What will sections do?

Answer:-

Sections are used while defining contract terms. Sections are headings under which we organize contract clauses. We can define sections that can be used in defining templates and contracts.

[Read More Answers.](#)

Question # 13

Why summary and line Tabs is required?

Answer:-

The header level information for contract is captured at top of the contract form and in summary tab. The summary tab includes information in various sub-tabs like parties, pricing/billing, renewal, administartion, security/text.

The line tab line tab captures the line level information for individual service, usage and subscription items. Line tab will have multiple sub-tabs accounts, effectivities, pricing/products, exemption/payment options, counters, events.

The summary tab and line tab is required for any service contract.
