Peoplesoft Job Interview Preparation Guide.

Question # 1

Which one of the following Data Types is NOT supported by the PeopleCode programming environment?

Answer:-

TIMESTAMP

[Read More Answers.](#)

Question # 2

What are the hyperlinks available in PeopleBooks? Some options with different hyperlinks not available in peoplebooks, select the correct one?

Answer:-

Study all hyperlinks in the first page of people books.

[Read More Answers.](#)

Question # 3

The example below demonstrates the use of SQR flags in the configuration manager directories folder: -F C: PSHrmsSqr. What do the above SQR flags signify to the SQR Report Writer upon execution?

Answer:-

Specifies the output path

[Read More Answers.](#)

Question # 4

When a business requirement in Fit/Gap Analysis does not meet by PeopleSoft then?

Answer:-

Some options are-1. Customize PS application (Yes)2. Buy third party software (Yes)3. Call PS Development Center for Enhancement (Yes)

[Read More Answers.](#)

Question # 5

Which of the following are parts of an AE program?

Answer:-

Section, Step and Action

[Read More Answers.](#)

Question # 6

For downloading patches and fixes, you have gone to the customer connection and looking under 8 April 2000 and see Report IDS like R-CCHEN-VP14JM. What does R stand for?

Answer:-

Released

[Read More Answers.](#)

Question # 7

You can specifically trace the activity of the PSAPPSRV server process by setting the?

Answer:-

PSAPPSRV.tracesql

[Read More Answers.](#)

Question # 8

Which of the following is correct in order to start the Process Scheduler Server from the command line using psadmin?

Answer:-

Psadmin -p start -d

[Read More Answers.](#)

Question # 9

In the following URL, which one is the component definition?

http://localhost/Peoplesoft/EMPLOYEE/PSFT_HR/c/PROCESS_SCHEDULER.PRCSTYPEDEFN.GBL

Answer:-

PRCSTYPEDEFN.GBL

[Read More Answers.](#)

Question # 10

You have created a Menu and a Page and given user access to that page, which of the tables gets affected on this (Scenario)?

Answer:-

PeopleTools Tables

[Read More Answers.](#)

Question # 11

You are a PeopleSoft Partner and wish to get information on database performance benchmark (or something like this) Where would you look for the info?

Answer:-

PeopleSoft Knowledge base SYSAUDIT finds for Orphaned Records

[Read More Answers.](#)

Question # 12

Is it possible to change Prompt Table with NO Edit to Prompt Table with Edit?

Answer:-

Only selection of existing data is possible

[Read More Answers.](#)

Question # 13

Which command is valid in both bootstrap and regular mode when operating the data mover?

Answer:-

GRANT_USER

[Read More Answers.](#)

Question # 14

What are the PeopleCode events pertaining to Record Field?

Answer:-

FieldEdit, SaveEdit, and RowDelete

[Read More Answers.](#)

Question # 15

Which of the following are Record field events?

Answer:-

FieldChangeSearchSave and SavePreChange

[Read More Answers.](#)

Question # 16

What commands are valid in BS mode?

Answer:-

ENCRYPT_PASSWORD

[Read More Answers.](#)

Question # 17

You have downloaded an Application fix as a project from the customer connection. Where would you upgrade it?

Answer:-

Demo

[Read More Answers.](#)

**Question # 18**

In which server, PS Query definition is stored?

Answer:-

DB Server

[Read More Answers.](#)

Question # 19

If you want to log into DataMover in Bootstrap mode, how would you login?

Answer:-

Database superuser

[Read More Answers.](#)

Question # 20

What is added as new option in Build apart from Create Tables, Indexes, and Views?

Answer:-

Create Trigger

[Read More Answers.](#)

Question # 21

Where will you configure for failover of Application Server (Scenario)?

Answer:-

Configuration.properties

[Read More Answers.](#)

Question # 22

Which one of the following is a transaction control statement?

Answer:-

Commit

[Read More Answers.](#)

Question # 23

Which one of the following steps is NOT part of performing an upgrade?

Answer:-

Apply all outstanding patches, prior to upgrade

[Read More Answers.](#)

Question # 24

What does Update and Fixes: R-* files refer?

Answer:-

Application Updates and Fixes

[Read More Answers.](#)

Question # 25

Which is not a part of AE Program, Options would be?

Answer:-

Action, Section, Step, Event

[Read More Answers.](#)

Question # 26

Which of the following are true with respect to validate sign in with database option enabled in psadmin?

Answer:-

1. The application server first attempts to connect to database using the user id and password.
2. User must be defined on either the operating system or the database and within the PeopleSoft.

[Read More Answers.](#)

Question # 27

Which of the Following are true for force Shutdown in PeopleSoft Domain Shutdown menu?

Answer:-

1. Shuts down the domain using the tmsshutdown -k TERM -c command.
2. A forced shutdown is a non-quiescent shutdown that immediately terminates all the processes

After logging into customer connection, you wish to search for fixes/patches. What are the search criteria available?

1. Report ID
2. Date / time
3. Release

[Read More Answers.](#)

Question # 28

Which one of the following tree types is NOT supported in the PeopleSoft tree manager?

Answer:-

1. Query trees
2. Combination trees

[Read More Answers.](#)

Question # 29

Which Web Services is only used as a Proxy Server?

Answer:-

1. MS IIS
2. Apache

[Read More Answers.](#)

Question # 30

In PeopleCode Debugger what are the valid values?

Answer:-

1. Go
2. Step Over
3. View Variable Value

[Read More Answers.](#)

Question # 31

List the components, which form the part of Integration Broker.

Answer:-

1. File Layout
2. CI
3. app. Messaging

[Read More Answers.](#)

Question # 32

What are the views available in App. Designer project?

Answer:-

1. Development
2. Upgrade

[Read More Answers.](#)

Question # 33

In which system, Database Connectivity Drivers should be installed?

Answer:-

1. Client Workstation in two-tier mode (Yes)
2. App Server (Yes)
3. Batch Server (Yes)
4. Data Mover (Yes)

[Read More Answers.](#)

Question # 34

If Customer wants to use a new Image in HRMS, where it is stored?

Answer:-

DB Server

[Read More Answers.](#)

Question # 35

Can you access pia from mac OS?

Answer:-

Yes

[Read More Answers.](#)

**Question # 36**

Which language technology is used in app messaging?

Answer:-

XML

[Read More Answers.](#)

Question # 37

Which one of the following PeopleCode debugging tools automatically converts values of any data type other than object into string values for viewing during debugging?

Answer:-

WinMessage

[Read More Answers.](#)

Question # 38

Where does set the web server cache?

Answer:-

Webserver configuration.properties file

[Read More Answers.](#)

Question # 39

Your company obtained the newest Application Release of PeopleSoft, and you need to prepare for the upgrade. Upon reading the new Release Notes, you notice that changes were made to two COBOL modules (batch programs). You need to decide how to compare the current versions of these COBOL programs with the versions delivered with the new PeopleSoft application release. Which would be the fastest method of comparing these different versions?

Answer:-

Use non-PeopleSoft comparison tools. 5.

[Read More Answers.](#)

Question # 40

A business Process is used as a Navigator Home page. True or False

Answer:-

True

[Read More Answers.](#)

Question # 41

The physical, dedicated tables are locked at the time the Application Engine program is loaded into memory. True or False

Answer:-

True

[Read More Answers.](#)

Question # 42

State Record can be Dynamic Record. True or False

Answer:-

True

[Read More Answers.](#)

Question # 43

In Call Section "Action" it is possible to leave the Program ID with blank Value in certain cases. True or False

Answer:-

True

[Read More Answers.](#)

Question # 44

You can assign multiple databases and application servers to a single profile. However, each database and application server must be assigned to only one profile. True or False

Answer:-

True

[Read More Answers.](#)

Question # 45

What are Menu types available?

Answer:-

1. Standard
2. Pop-Up

[Read More Answers.](#)

Question # 46

Where do you need to install connectivity software?

Answer:-

We need to install Connectivity Software on Appserver and scheduler server if they are not on the Database server

[Read More Answers.](#)

Question # 47

What is the purpose of state records?

Answer:-

To store application data for life of the application Engine process

[Read More Answers.](#)

Question # 48

What is the most important Record in PS HRMS?

Answer:-

JOB record

[Read More Answers.](#)

Question # 49

What is dynamic view?

Answer:-

Dynamic View is similar to SQL View but we cannot build the dynamic view. When we do not want store the database then us dynamic view.

[Read More Answers.](#)

Question # 50

What is the difference between SQL View and Query View?

Answer:-

In Sql view manually write the SQL statement, Query view use the PS QUERY tool.

[Read More Answers.](#)

Question # 51

What is section?

Answer:-

A section is a set of ordered steps that is executed as part of a program. You can call sections (and other programs) from steps within other sections.

[Read More Answers.](#)

[Read More Answers.](#)

Question # 55

What is Activity Type? What is Cost Center? What is GAP Analysis? Explain with real time scenario.

Answer:-

Activity type is the nature of "action committed or happened" and nature depends on the environment. The all value paid or bear is located in small center is called Cost Center. GAP Analysis is finding out the "Deficiency or gap" between ideal system or standard system and existing or current system.

[Read More Answers.](#)

Question # 56

If we use SQL and Call section at same time then Database deadlock will occur. Why does this Dead lock Occur?

Answer:-

When a SQL is run, there is a lock on the table by the database until that section is completed. If during that time there runs some other process, which will use the same table locked by our section using call section, this process will fail.

[Read More Answers.](#)

Question # 57

What are all the steps involved in Upgrade process?

Answer:-

Plan the Upgrade :

- 1) Prepare Copy of Production Database
- 2) Install New Release
- 3) Upgrade People Tools
- 4) Run and Review Compare Reports
- 5) Apply Application Changes
- 6) Complete Production Copy
- 7) Test the Upgrade
- 8) Move into Production

[Read More Answers.](#)

Question # 58

Explain what are component buffer and data buffer.

Answer:-

Component Buffer:

Component Buffer contains all the Data of active component.

Data Buffer: Data Buffer contains Data other then the Data in the Component Buffer.

Data Buffer classes are available in people code, Rowset, Row, Record, Field, Array, Sql, File, chart, Drid and so on.

[Read More Answers.](#)

Question # 59

What are the views available in App. Designer project workspace?

Answer:-

Development and Upgrade Views

[Read More Answers.](#)

Question # 60

What are the statuses available in PeopleSoft Domain Status Menu?

Answer:-

- 1) Server Status
- 2) Client Status
- 3) Queue Status

[Read More Answers.](#)

Question # 61

What are the differences between RowClass and RowSet in PeopleSoft?

Answer:-

Rowclass is a single row of data that consists of 1 to n records of data. Rowset object is a data structure used to describe hierarchal data. It consists of a collection of rows.

[Read More Answers.](#)

Question # 62

What is the default Crystal Report that PeopleSoft Query tool creates?

Answer:-

ACTQRY.RPT

[Read More Answers.](#)

Question # 63

What Record Changes does not affect Database?

Answer:-

Derived work record
Subrecord
Dynamic view
These record changes do not affect the DB

[Read More Answers.](#)

Question # 64

What views available in Application Designer project workspace?

Answer:-

1. Development View
2. Upgrade View

[Read More Answers.](#)

Question # 65

With reference to the Component Interface Tester which of the following is NOT TRUE?

Answer:-

GetExisting option is equivalent to opening a record in Update/Display Mode only

[Read More Answers.](#)

Question # 66

What are the main attributes of a Component Interface (CI)?

Answer:-

Keys, Properties & Collections, Methods, and Name

[Read More Answers.](#)

Question # 67

Which of the following is NOT TRUE in Component Interface (CI) Architecture?

Answer:-

A component interface can be mapped to multiple PeopleSoft components

[Read More Answers.](#)

Question # 68

Will Tuxedo continue to be used in a PeopleSoft/WebSphere or PeopleSoft/WebLogic environment?

Answer:-

Yes.
WebSphere or WebLogic are used as the HTTP server and servlet engine. They are not used as middleware with the PeopleSoft Application Server. Tuxedo is always used with PIA, regardless of the HTTP server or Java servlet engine.

[Read More Answers.](#)

Question # 69

Can a PeopleTools 8.4 and a PeopleTools 8.1 application server run on the same machine?

Answer:-

Yes, both PeopleTools 8.4 and PeopleTools 8.1x application servers can run on a single machine. It is important to ensure that there are no port clashes between the installations.

[Read More Answers.](#)

Question # 70

IBM How should Web Application Servers be used with PeopleTools 8.1x and PeopleTools 8.4?

Answer:-

The PeopleSoft Internet Architecture uses a web application server and an HTTP server. PeopleTools 8.12 and above include both BEA WebLogic and Apache with Jserv. With PeopleTools 8.4, both BEA WebLogic and IBM WebSphere are bundled. Apache with Jserv is no longer a supported web application server combination. Customers can choose which web application server to run during installation time.

In a mixed PeopleTools 8.1x and 8.4 environments, each PeopleTools installation should have their own chain of web application server and application server, PeopleSoft Proprietary and Confidential Page 5 and these can be on the same machine. For example, a PeopleTools 8.1x installation using Apache and Jserv could reside on the same machine as a PeopleTools 8.4 installation using IBM WebSphere. Care should be taken to ensure that unique port numbers are assigned to each server chain.

[Read More Answers.](#)

**Question # 71**

Are disconnected mobile applications supported in PeopleTools 8.1x?

Answer:-

No. The PeopleSoft Mobile Agent architecture, which is used to support disconnected mobile applications, is only available in PeopleTools 8.4. The PeopleSoft Mobile Agent is dependent upon certain core technologies that were specifically developed for PeopleTools 8.4.

[Read More Answers.](#)

Question # 72

Is web server load balancing supported with PeopleTools 8.4?

Answer:-

Customers can set up clusters of BEA WebLogic or IBM WebSphere servers to do web server load balancing. In such scenarios, if an instance is down, requests are automatically routed to another instance. For more information on high availability and clustering with WebLogic, WebSphere and other web servers.

[Read More Answers.](#)

Question # 73

What HTTP servers and Java servlet engine combinations are supported with PeopleTools 8.4?

Answer:-

All popular http servers (reverse proxies) are supported. Please refer to the platforms database on Customer Connection for specific information on current certified platforms.

[Read More Answers.](#)

Question # 74

Where the WorkItem is available?

Answer:-

WorkList Record

[Read More Answers.](#)

Question # 75

Where is workflow work items found?

Answer:-

Worklist

[Read More Answers.](#)

Question # 76

What BEA product is used for DB transaction in PS?

Answer:-

Tuxedo

[Read More Answers.](#)

Question # 77

What is the status available in PeopleSoft Domain Status Menu?

Answer:-

Server, Client and Queue Status

[Read More Answers.](#)

Question # 78

What event is fired after DB Update?

Answer:-

Save Post Change

[Read More Answers.](#)

Question # 79

Which process is used for running AE programs, which are to be run at a frequency of less than a day?

Answer:-

PSDAEMON

[Read More Answers.](#)

Question # 80

Which RDBMS uses Tablespace?

Answer:-

Oracle, DB2, Other Options: SQL Server, Informix, Sybase

[Read More Answers.](#)

Question # 81

How do you login into BS mode?

Answer:-

DB Access Id

[Read More Answers.](#)

Question # 82

Activate Event is Valid for following?

Answer:-

Standard & Secondary

[Read More Answers.](#)

Question # 83

What are Menu types available?

Answer:-

1. Component
2. PeopleCode
3. Separator

[Read More Answers.](#)

Question # 84

What is the output when Query is split?

Answer:-

Component and Query view

[Read More Answers.](#)

Question # 85

What are destructive statements in SQL?

Answer:-

- b) Recreate a Table
d) Recreate a View

[Read More Answers.](#)

Question # 86

What does ER Diagrams represent?

Answer:-

- a) Graphical Representation of Business process and Relations
b) Flowchart of tables and Fields

[Read More Answers.](#)

Question # 87

On which servers Tuning can be done.

Answer:-

- a) Database Server
b) App Server
c) Batch Server
d) Web Server

[Read More Answers.](#)

Question # 88

What are the uses of process profile?

Answer:-

(Scenario based on process profile / process group) Server o/p path override, process he can access.

[Read More Answers.](#)

Question # 89

Where is Unicode used?

Answer:-

- 1) IBM DB2/UDB
- 2) Oracle

3) SQL Server

[Read More Answers.](#)

Question # 90

Which of the above record definitions is NOT stored on the database and therefore not required to build?

Answer:-

Driven Work Record definitions not stored in the database and not require for build. When a business requirement in Fit/Gap Analysis does not meet by PeopleSoft then go for customizations through Consultants

[Read More Answers.](#)

Question # 91

What are the Search Keys you use to find Patches and Fixes?

Answer:-

Report id date release

[Read More Answers.](#)

Question # 92

What are the People Tools available for Integration Broker?

Answer:-

The tools available are Application designer and Integration Broker Setup on the Portal. In peopleSoft, 8.48 messages and Queues can be created from the Setup itself.

[Read More Answers.](#)

Question # 93

SYSAUDIT finds for_____.

Answer:-

Orphaned Objects

[Read More Answers.](#)

Question # 94

You want to update your password and enter a hint for forgotten password. What would you access?

Answer:-

Profile

[Read More Answers.](#)

Question # 95

Which of the following commands can be run in Bootstrap mode?

Answer:-

Bootstrap mode is actually logging into the App designer in 3-tier mode i.e. Logon to the App server. Data mover scripts are run on 3-tier mode.

[Read More Answers.](#)

Question # 96

Which of the following fires after the database is updated?

Answer:-

SavePostChange

[Read More Answers.](#)

Question # 97

What are the Record field events?

Answer:-

1. FieldChange
2. FieldDefault
3. FieldEdit
4. FieldFormula
5. PrePopup
6. RowDelete
7. RowInit
8. RowInsert
9. RowSelect
10. SaveEdit
11. SavePostChg
12. SavePreChg
13. SearchInit
14. SearchSave

15. Workflow

[Read More Answers.](#)

Question # 98

What Record Changes does not affect Database?

Answer:-

List Box item

[Read More Answers.](#)

Question # 99

Which RDBMS uses Tablespace?

Answer:-

Oracle, db2, Informix

[Read More Answers.](#)

Question # 100

How do you set up table sharing in PeopleTools applications?

Answer:-

SETID

[Read More Answers.](#)

Question # 101

How will you get a single output by combining two or more queries?

Answer:-

Using UNION

[Read More Answers.](#)

Question # 102

What is the purpose of State Record?

Answer:-

State Records are used in AE to pass values from action and section to the other. It also allows you to restart the App engine. For this, the State record has to be a SQL table. A state record either can be an SQL table or derived Work record. Process_instance field is mandatory in the State Record.

[Read More Answers.](#)

Question # 103

Tell me your experience with CI?

Answer:-

CI's can be used to upload data from legacy systems through excel to CI or create new data within PeopleSoft from another component.

[Read More Answers.](#)

Question # 104

How do you decide between appeng/Ci and SQR while conversion?

Answer:-

When you want to validate data upfront before loading them into db, better plan to use appeng or ci, when you are thinking of huge data to be loaded SQR would be a better option

[Read More Answers.](#)

Question # 105

What is the performance tuning of SQR?

Answer:-

1. Use Load-lookup and Arrays
2. Use SQT files.
3. Generate multiple reports.
4. Use correct sql joins.

[Read More Answers.](#)

Question # 106

What is the difference between SaveEdit and FieldEdit?

Answer:-

Field Edit Validate particular field only, but Save Edit validates all the fields in that component.

[Read More Answers.](#)

**Question # 107**

What are the differences between AE and SQR?

Answer:-

AE is built on PeopleSoft proprietary language called People Code, where as SQR is a third party tool.

[Read More Answers.](#)

Question # 108

What is record, row peoplecode?

Answer:-

Record peoplecode is triggered whenever you deal with the record. EX when u right a piece of code on Record Field change that code is fired whenever the Field is changed in any page. There is nothing called Row PeopleCode.

[Read More Answers.](#)

Question # 109

How do you retrieve a value from scroll.scroll select?

Answer:-

Scrollselect (1, targetname, recordfilename)

[Read More Answers.](#)

Question # 110

What is the difference between sql statements and metasql statements?

Answer:-

SQL statements are Database specific whereas meta-SQL statements are Db independent.

[Read More Answers.](#)

Question # 111

What are the different ways to run AE, SQR? (Command, process scheduler)

Answer:-

2-tier, 4-tier, process scheduler

[Read More Answers.](#)

Question # 112

How do you delete a file using sqr?

Answer:-

delete(\$filename)

[Read More Answers.](#)

Question # 113

The Trace tab in Configuration Manager only traces Windows client (two-tier) interactions. True or False

Answer:-

True

[Read More Answers.](#)

Question # 114

Trigger Business Event is used for triggering the workflow and it is written on workflow event. Trigger Business Event has the syntax `Trigger Business Event has the syntax Trigger Business Event has the syntax`_____.

Answer:-

Trigger Business Event (BusProcess, BusActivity, BusEvent);

[Read More Answers.](#)

Question # 115

The following is an entry from the application reviewer LOG File: start Field=PERSONAL_DATA.EMPLID-RowInit Temps=1 Stack=4 Source=233. What does the Source= 233 parameter in the above LOG file entry identify?

Answer:-

The statement being executed is line 233 of the PeopleCode program.

[Read More Answers.](#)

Question # 116

What the following command will do? (Psadmin -p start -d hrdmo)

Answer:-

Starts a Process Scheduler

[Read More Answers.](#)

Question # 117

Which of the Task cannot be done through PSADMIN?

Answer:-

Starting Web Server

[Read More Answers.](#)

Question # 118

What is the result of the search with the following criteria in PS Books?

Answer:-

SQL Table OR Field

[Read More Answers.](#)

Question # 119

What category of commands can be executed in data mover?

Answer:-

Sql, data mover commands

[Read More Answers.](#)

Question # 120

The example below demonstrates the use of SQR flags in the configuration manager directories folder: -F C:\PSHrmsSqr What do the above SQR flags signify to the SQR Report Writer upon execution?

Answer:-

Specifies the output path

[Read More Answers.](#)

Question # 121

The application server dynamically scales server processes according to the volume of transaction requests, which is known as?

Answer:-

Spawning

[Read More Answers.](#)

Question # 122

Where do you create the process security groups?

Answer:-

Security Administrator 20

[Read More Answers.](#)

Question # 123

What is the event that fires after all database updates?

Answer:-

Save post change

[Read More Answers.](#)

Question # 124

In which one of the following views would you see the fields, criteria, and other details associated with the current query?

Answer:-

Query view 9

[Read More Answers.](#)

Question # 125

From the following statements, which one is NOT true about Pub Broker?

Answer:-

Pub Broker is invoked after Pub Contractor Handler evaluates routing rules and writes contract(s)

From the following statements, which one is NOT true about Pub Broker?

Psserver in configuration properties

[Read More Answers.](#)

Question # 126

PeopleSoft tracks object changes using a system table. Which PeopleTools System table is used to track object changes?

Answer:-

PSRELEASE

[Read More Answers.](#)

Question # 127

PeopleSoft has its own naming convention for system and non-system (application) tables. In the list below, RECORDNAME refers to the name of any table or record. Referring to the above information, which one of the following identifies the naming convention PeopleSoft uses for system tables.

Answer:-

PSRECORDNAME

[Read More Answers.](#)

Question # 128

Which is a record that PeopleTools adds to every level of the Message Structure during processing?

Answer:-

PSCAMA

[Read More Answers.](#)

Question # 129

What is the configuration file that contains the entire collection configuration values for a given application server domain?

Answer:-

PSAPPSRV.CFG

[Read More Answers.](#)

Question # 130

Which command shuts down an application server domain using a "forced" shutdown method?

Answer:-

psadmin -c shutdown! -d ps800dmo

[Read More Answers.](#)

Question # 131

Which Three PeopleSoft Tables the DB User mentioned in Connect ID should have permission?

Answer:-

PSACCESSPRFLPSSTATUS PSOPRDEFN

[Read More Answers.](#)

Question # 132

Assume that you just finished customization work that involved the creation of many new objects. You can move these objects from your development database (source) to a testing database (target) to conduct more elaborate testing. Referring to the above information, why would adding your objects to a Project streamline the migration to a new database?

Answer:-

Projects provide the ability to migrate all objects at once or each object type individually.

[Read More Answers.](#)

Question # 133

Which of the following menu options allows you to modify the Last Process Instance Number used within the system?

Answer:-

Process Scheduler, Use, Process Definitions

[Read More Answers.](#)

Question # 134

Which Trace 255 command line options produces the trace file with the name?

Answer:-

PID.AET

[Read More Answers.](#)

Question # 135

Where can you see the status of the job report and details in secured way?

Answer:-

Process monitor

[Read More Answers.](#)

Question # 136

How can you set Non-Repudiation property?

Answer:-

PIA-.PeopleTools-> Integration Broker->Node DefinitionApplication Designer->Message ->Properties

[Read More Answers.](#)

Question # 137

If you delete a page from PSPT application, which all tables are affected?

Answer:-

People Tools

[Read More Answers.](#)

Question # 138

If you change the long name of translate field what object is to be altered?

Answer:-

Page def

[Read More Answers.](#)

Question # 139

When do configuration changes made using the configuration Manager take effect?

Answer:-

Once you exit PeopleSoft and log back in.

Question # 150

Can a PeopleTools 8.4 and a PeopleTools 8.1x database run on the same machine?

Answer:-

Yes, databases can co-exist on the same physical machine. In most cases, the databases themselves can exist within the same RDBMS; however, it is important to verify that the database version required by PeopleTools 8.4 is the same as for the current PeopleTools 8.1x implementation.

[Read More Answers.](#)

Question # 151

How does the PeopleSoft Enterprise Portal work with 8.1x and 8.4 applications?

Answer:-

There are several scenarios that may exist when customers use the PeopleSoft Enterprise Portal with a mixture of 8.1x and 8.4 applications. Specific information on the use of the PeopleSoft Enterprise Portal in a blended environment will be available in a forthcoming white paper, which will be available on Customer Connection. In general, the recommendation is to use the PeopleSoft Enterprise Portal 8.4 with 8.1x and 8.4 applications, rather than an older version.

Question # 152

For the servlet layer on the web server, what version of the Java Servlet API are the PIA Java Servlets coded to with PeopleTools 8.4?

Answer:-

The PIA Java servlets in PeopleTools 8.4 are coded to JavaSoft's Java Servlet API 2.0 and are fully compatible with Servlet API 2.2. It should be noted that the PeopleSoft Internet Architecture is supported only on the BEA WebLogic and WebSphere servlet engines.

Question # 153

Why did PeopleSoft bundle IBM WebSphere Advanced Single Server Edition rather than Advanced Edition?

Answer:-

The Advanced Single Server Edition (AEs) of WebSphere provides the same core J2EE and Web Services programming model as the Advanced Edition (AE) with simplified administration. In the AE version, WebSphere uses DB2 or other standard database to keep the configuration and runtime information to support very large farm of WebSphere servers. However, it is one more database to install, administer, and maintain.

Peoplesoft Interview Questions And Answers

The AEs version does not use the database and uses file based configuration in a way that is similar to BEA WebLogic. PeopleSoft and IBM WebSphere architects determined that AEs version would satisfy the deployment requirements of PeopleSoft customers and would make it easy for owning and administering PeopleSoft Applications based on WebSphere.

Question # 154

Will the PeopleSoft Internet Architecture, now that it embeds BEA WebLogic and IBM WebSphere, work with other corporate web servers and tools?

Answer:-

One of the core values of the PeopleTools development group is investment protection. The time, money, and resources that you may have already invested in-

- 1) Licensing another web server
- 2) Training developers and administrators
- 3) Building and deploying other web applications will not be compromised by this decision.

[Read More Answers.](#)

Question # 155

Is BEA WebLogic the same thing as the web server that was previously on the Tuxedo CD?

Answer:-

No. The web server that was delivered on the Tuxedo CD has absolutely nothing to do with WebLogic. WebLogic is a web application server that is designed for large-scale production websites. The HTTP server on the Tuxedo CD was only there to provide a mechanism for launching the graphical Tuxedo administration console if the Tuxedo administrator did not already have a web server in place. It was never intended for large-scale, production website use - only for a system administrator or two.

Question # 156

Is WebSphere certified on PeopleTools 8.1x?

Answer:-

No. IBM WebSphere is certified on PeopleTools 8.4 only. Customer wishing to use IBM WebSphere with PeopleTools 8.1x may take advantage of an IBM WebSphere for early adopters program, created and managed by IBM. Further information about this program can be found in the whitepaper The IBM WebSphere 8.1x Early Adopter Program.

[Read More Answers.](#)

Question # 157

Are there advantages or disadvantages to using BEA WebLogic over IBM WebSphere or vice versa?

Answer:-

No. Both products are certified with PIA as of version 8.4 and work equally well. By offering both BEA WebLogic and IBM WebSphere, we give our customers more choices and flexibility to run PeopleSoft in their preferred environment.

[Read More Answers.](#)

Question # 158

Both BEA WebLogic and IBM WebSphere have the ability to plug into many different web servers. Does PeopleSoft support the web servers that they plug into?

Answer:-

BEA and IBM provide plug-ins for many of the leading web servers. This allows the customer to use their own HTTP web server and Web Logic's or Web Sphere's Java servlet engine. PeopleSoft uses this plug-in capability to support IIS. We have no reason to believe that there will be any issues with other web servers. That WebLogic or WebSphere are able to work with through their plug-in architecture, but PeopleSoft GSC will not support these other web servers with PeopleTools 8.4.

Question # 159

Does Application Messaging work between 8.1x and 8.4 applications?

Answer:-

Application Messaging is used by PeopleSoft applications to communicate with one another. This is true not just for 8.1x and 8.4 applications, but also between an 8.1x and an 8.4 application. For example, the HRMS 8.3 applications, which are based on PeopleTools 8.15, can communicate with Financials 8.4 applications, which are based on PeopleTools 8.4, using Application Messaging. If specific issues materialize relating to the Application Messages published by certain applications, these new messages will be made available to customers.

[Read More Answers.](#)

Question # 160

Why is PeopleSoft no longer supporting Apache Jserv?

Answer:-

Apache JServ was a servlet engine that was supported in PeopleTools 8.1x. This support has been removed from PeopleTools 8.4 for several reasons: v JServ is no longer an active product and is in maintenance mode and there are no longer any new official releases. v Our customers have exhibited a desire to use commercial products for mission-critical enterprise web application servers rather than open source solutions. Therefore, moving to support Tomcat is not seen as a reasonable solution. v Apache can still be used as an HTTP server with BEA WebLogic .

Question # 165

Your Onsite DBA has called you up and told you that one of the tables PS_ABC_TAO has grown very big in size. Based on the standard naming convention, you have determined that the record is a temporary record since it ends with _TAO you look into the database and decide that that the data is not required any more. You ask the DBA to delete the data in the table. Next day you get a call from an irritated user who says that a daily process that took only 1 minute to run is taking about 2 hours today. You look into his process and find that it uses PS_ABC_TAO as a temporary table. What would you suggest the DBA to do?

Answer:-

Update statistics on the table

[Read More Answers.](#)

Question # 166

What is DBA Purging Temporary Table?

Answer:-

Update Statistics
