Pidilite Industries Job Interview Preparation Guide.

Question # 1

Top 11 Questions to Verify Experience and Credentials In Pidilite Industries:

Answer:-

Sometimes people want a job a little too bad - and they may fudge their credentials and experience a bit.

If you've run into this problem, are worried about it, or have credentials and experience that are absolutely essential, you may need to ask a few verification questions. If you are a candidate, you should review your resume and make sure you know all the key points, and that nothing has been misconstrued.

1. What grades did you get in college?
2. What were your responsibilities when you worked in job x?
3. How many people were on your team at your last job?
4. What will your previous manager/supervisor say when I ask where you needed to improve?
5. What was your beginning and ending salary at job x?
6. What were your beginning and ending titles at job x?
7. Are you eligible for rehire at job x?
8. What tools are necessary for performing job x?
9. Describe to me how you would perform [x typical job task].
10. What was the focus of your thesis?
11. When did you leave company x?

Question # 30

How would you estimate the weight of the Chrysler building?

Answer:-

This is a process guesstimate where the interviewer wants to know if you know what to ask. First, you would find out the dimensions of the building (height, weight, depth). This will allow you to determine the volume of the building. Does it taper at the top? (Yes.) Then, you need to estimate the composition of the Chrysler building. Is it mostly steel? Concrete? How much would those components weigh per square inch? Remember the extra step: find out whether you're considering the building totally empty or with office furniture, people, etc. If you're including the contents, you might have to add 20 percent or so to the building's weight.

Question # 34

How would you feel about working for someone who knows less than you In Pidilite Industries?

Answer:-

The reality is, the majority of the time someone is in a management/leadership position is because of their experience and past success. So they probably possess at least a unique set of knowledge from you. So you'll want to learn from them as much as possible. If it's not the case, then discuss how you would look for mentors in different departments to help your personal career development.

Question # 35

Why are manhole covers round?

Answer:-

This is a classic brainteaser, which was reportedly first asked by a Microsoft interviewer. Here's how to "solve" this brainteaser (remember to speak and reason out loud while solving this brainteaser): Why are manhole covers round? Could there be a structural reason? Why aren't manhole covers square? It would make it harder to fit with a cover. You'd have to rotate it exactly the right way.

The pipes below are also round, so fitting them might be easier, as might be making them. So many manhole covers are round because they don't need to be rotated. There are no corners to deal with. Also, a round manhole cover won't fall into a hole because it was rotated the wrong way, so it's safer. Looking at this, it seems corners are a problem. You can't cut yourself on a round manhole cover. And because it's round, it can be more easily transported. One person can roll it.

Question # 46

What is your greatest failure In Pidilite Industries, and what did you learn from it?

Answer:-

When I was in college, I took an art class to supplement my curriculum. I didn't take it very seriously, and assumed that, compared to my Engineering classes, it would be a walk in the park. My failing grades at midterm showed me otherwise. I'd even jeopardized my scholarship status. I knew I had to get my act together. I spent the rest of the semester making up for it, ended up getting a decent grade in the class. I learned that no matter what I'm doing, I should strive to do it to the best of my ability. Otherwise, it's not worth doing at all.

Question # 49

How many square feet of pizza are eaten in the United States each month?

Answer:-

This is a classic guesstimate question where you need to think aloud. And so first off you round the U.S. population to 300 million people (it's actually about 315 million but rounding will be much easier and your interviewer will not score you lower for rounding). Then estimate how many people eat pizza. A decent educated guess is two out of every three people, or 200 million. Now let's say the average pizza-eating person eats pizza twice a month, and eats two slices at a time. That's four slices a month. If the average slice of pizza is perhaps six inches at the base and 10 inches long, then the slice is 30 square inches of pizza. So, four pizza slices would be 120 square inches (30 times 4).

Since one square foot equals 144 square inches (12 times 12), let's assume that each person who eats pizza eats one square foot per month. Since there are 200 million pizza-eating Americans, 200 million square feet of pizza are consumed in the U.S. each month. To summarize: 300 million people in America, 200 million eat pizza, average slice of pizza is six inches at the base and 10 inches long or 30 square inches, average American eats four slices of pizza a month, four pieces times 30 square inches equals 120 square inches (one square foot is 144 square inches), so let's assume one square foot per person, and thus one square foot times 200 million people equals 200 million square feet of pizza a month.
