Question # 7

Suppose You have been given the responsibility for improving the quality of software across your organization. What is the first thing that you should do? What's next? Make a list of various quality assurance activities that you will carry out for the system

Answer:-

* FIRT OF ALL I HAVE HAVE TO HAVE A CLEAR KNOWLDGE ABOUT THE SOFT WARE!
* secondly i will search for errors that need to be improved or corrected.

* thirdly i will ask other profetional persons to share there ideas with me if it is beyond my profetion.
* in forth place i will start to design what the system wiil look like after i made the corrections.
* after i have done all of these i wil test the sysem with many examples as i could.
* then i will check if the software is accessable by the organization.It means that i have to full fil the organizations need towards the software.
* if the organizations need is not filled i will search for errors again and continue all processes until i reach to the point i am requierd!!
