SAP NetWeaver Job Interview Preparation Guide.

Question # 1

What is the SAP?

Answer:-

SAP stands for System Analysis and Program Development.

SAP's Business Suite has four applications as below:

- 1..customer relationship management (CRM) - helps companies acquire and retain customers, gain marketing and customer insight
- 2..product lifecycle management (PLM) - helps manufacturers with product-related information
- 3..supply chain management (SCM) - helps companies with the process of resourcing its manufacturing and service processes
- 4..supplier relationship management (SRM) - enables companies to procure from suppliers
- 5..enterprise resource planning (ERP)

Question # 2

Who will prepare the functional spec?

Answer:-

Functional Spec derives from Software requirements.

Software requirement derives from Marketing requirements.

MRs will be prepared by Business Analysts with help of EndUsers.

So, Functional Spec is a small piece of requirement to fill business requirement. Finally the Functionality will be validated/Verified against MRs tested by End User during user acceptance testing.

Finally, S/W Functional specs will be prepared by Process Owners / Business Analysts.

Question # 6

Suppose I have IDoc to file Scenario is there. In that why dont you create sender agreement for this scenario. Please let me know proper reason.?

Answer:-

This is because, the IDOC communication exists between SAP system and PI system. In case of sender being SAP system, the RFC destination are created at SAP end and the IDOC is directly posted into the PI system port through Native Communication. Hence no Sender agreement is required.
