Question # 3

What is aMilestone Confirmation?

Answer:-

The milestone confirmation is a special form of confirmation, in which the confirmation of one operation causes other operations or suboperations to be automatically confirmed at the same time.

Milestones are operations that have the corresponding indicator in the control key.

Operations can be defined as milestone operations in their control keys. If a milestone operation is confirmed, then previous operations are automatically confirmed.

Question # 5

How to set the deletion flag to Functional location and also want to know how to hide the flagged Functional location?

Answer:-

You can use transaction code IL02 to change functional location, highlight the respective functional location and go to edit at the top tool bar, there you select functions change and there you can click delete, to set a flag delete. You cannot hide this functional location when you display IH01, the functional location hierarchy is displayed but once you click it, the screen appears showing the functional location is created with flag for deletion

Question # 7

How to schedule counter base maintenance plan for DG in power plant that need 800hr per month maintain these steps I followed.

1) I have created meas pt with counter (IK01) created meas document IK11 then schedule thru IP10.
but not getting due order list in ip24

Answer:-

First of all, you cannot get 800 hrs per month...
For counter based... it will schedule in two days... like.. days and hours... but.. if you schedule in IP10..it will take the annual reading and schedule the dates.. So.. if the running hrs didn't reach, but the date reached... so.. it will open an order...
Give the annual reading according to the running hrs of the DG.. then you will get

Question # 8

What is the use of item number in maintenance order?

Answer:-

Item number refers to the number (not material number) to identify the material component that is to be used for an operation in the maintenance order. It is generally given in increments of 0010. It is the first field in the Components tab of a maintenance order.

Question # 10

What is Work Centre Category?

Answer:-

Basically work center category decides the capacity (means ability to do work). The category defines the activity type for costing and scheduling the categories mainly we come across in the production are labour and machine. Hence to define labour cost, machine cost and setup cost we define work center category to create work center and we enter

defaults therein. For a period of time if there are no much changes we generally prefer production line, and if there are much changes in the production we prefer activity type for individual order which we call production order. By this you can understand cat type 001 for machine and cat type for labour.

Work center category used to define which screen selection & field selection for a particular work center.
