Supervisor Stockroom Store Interview Questions And Answers

Question # 38

Why are manhole covers round?

Answer:-

This is a classic brainteaser, which was reportedly first asked by a Microsoft interviewer. Here's how to "solve" this brainteaser (remember to speak and reason out loud while solving this brainteaser): Why are manhole covers round? Could there be a structural reason? Why aren't manhole covers square? It would make it harder to fit with a cover. You'd have to rotate it exactly the right way.

The pipes below are also round, so fitting them might be easier, as might be making them. So many manhole covers are round because they don't need to be rotated. There are no corners to deal with. Also, a round manhole cover won't fall into a hole because it was rotated the wrong way, so it's safer. Looking at this, it seems corners are a problem. You can't cut yourself on a round manhole cover. And because it's round, it can be more easily transported. One person can roll it.

Question # 45

How many square feet of pizza are eaten in the United States each month?

Answer:-

This is a classic guesstimate question where you need to think aloud. And so first off you round the U.S. population to 300 million people (it's actually about 315 million but rounding will be much easier and your interviewer will not score you lower for rounding). Then estimate how many people eat pizza. A decent educated guess is two out of every three people, or 200 million. Now let's say the average pizza-eating person eats pizza twice a month, and eats two slices at a time. That's four slices a month. If the average slice of pizza is perhaps six inches at the base and 10 inches long, then the slice is 30 square inches of pizza. So, four pizza slices would be 120 square inches (30 times 4).

Supervisor Stockroom Store Interview Questions And Answers

Since one square foot equals 144 square inches (12 times 12), let's assume that each person who eats pizza eats one square foot per month. Since there are 200 million pizza-eating Americans, 200 million square feet of pizza are consumed in the U.S. each month. To summarize: 300 million people in America, 200 million eat pizza, average slice of pizza is six inches at the base and 10 inches long or 30 square inches, average American eats four slices of pizza a month, four pieces times 30 square inches equals 120 square inches (one square foot is 144 square inches), so let's assume one square foot per person, and thus one square foot times 200 million people equals 200 million square feet of pizza a month.

What problems have you encountered at work?

Answer:-

Wow, do we have problems! Where do I begin? Well, most of the problems are internal, just people not working well with each other. I have one person on our team who is a real problem, but it seems like management is afraid to do anything about it. So we all end up having to do extra work to cover for this person, who just doesn't work. We all say that he's retired in place. I think he's just holding on until retirement in a couple years. But he's a real problem. I complain about it--a lot--but nothing ever seems to get done. I've even written negative reviews about the person, hoping he will get canned, but it doesn't happen. I can't wait for him to retire.
