## Tomcat Job Interview Preparation Guide.

### Question # 1

What is different between webserver and application server?

#### Answer:-

The basic difference between a web server and an application server is

Webserver can execute only web applications i.e servlets and JSPs and has only a single container known as Web container which is used to interpret/execute web applications

Application server can execute Enterprise application, i.e (servlets, jsp, and EJBs) it is having two containers 1.

Web Container(for interpreting/executing servlets and jsp)  
2. EJB container(for executing EJBs). it can perform operations like load balancing , transaction demarcation etc etc
