Answer:-

Search Engine Result Page or SERP refers to the page that is displayed when a specific search query is entered over the search engine. Apart from showing a list of results, SERP might also include advertisements.

[Read More Answers.](#)

Question # 8

Do you know what are Heading tags?

Answer:-

In SEO, heading or header tags are used to separate the heading and sub-heading of any content from the rest of the web page. There are 6 heading tags used in SEO in a top down hierarchy.

Ranging from h1 to h6, header tags bring coherence in content along with relevancy and keyword consistency in the search results displayed on SERPs.

[Read More Answers.](#)

Question # 9

Tell me what is a Do-Follow link?

Answer:-

A Do-Follow Link, as the name suggests, allows Google link calculator called PageRank to count all the inbound links from other web pages and websites as link points.

The higher the link juice or link points are, the greater would be the search ranking of that web page, as these links make the web page appear very relevant and popular to the Google search engines.

[Read More Answers.](#)

Question # 10

Tell us what is HTML Sitemap?

Answer:-

An HTML sitemap comprises of one single HTML page that bears the links of all the web pages of any specific website. This sitemap holds the foundation of all web pages of any website.

HTML sitemap contains all formatted text files and linking tags of any website. It is particularly useful when you have a large website with multiple web pages, because it helps you to improve the navigation of your website by listing all the web pages in one place in a user-friendly manner.

[Read More Answers.](#)

Question # 11

Tell me what is Google Webmaster Tools/Google Search Console?

Answer:-

It was on 20th May, 2015 that Google changed the name of Google Webmaster tools to Google Search Console.

Google Search Console provides free web services to the web masters by enabling them to monitor and sustain the online presence of their specific websites.

[Read More Answers.](#)

Question # 12

Tell me what is Domain Authority?

Answer:-

Considered to be one of the most influential SEO factors, domain authority is a key performance metric developed by Moz, which rates any website on a 1-100 scale.

The greater your DA, the more likely your website to have strong traffic and high ranking in Google.

You can check domain authority of any website in Open Site Explorer.

Domain Authority in SEO

This metric effectively predicts the search ranking of any website in future, based on the strength of the domain authority.

Domain authority is evaluated to check the credibility of any website. Lots of high quality and relevant backlinks help to increase Domain Authority.

Answer:-

Keyword frequency is the number of times a keyword or phrase appears on a single Web page.

[Read More Answers.](#)

Question # 56

What is ccTLD?

Answer:-

It's country code top-level domains.

[Read More Answers.](#)

Question # 57

What is Pogo-Sticking?

Answer:-

Pogo-sticking is defined as going back and forth from a search engine results page (SERP) to an individual search result destination site.

This means that when the searcher clicks on a link on a SERP, sees that it's not what he/she is looking for, immediately leaves by hitting the back button.

Google doesn't like pogo-sticking at all. The reason why is very obvious: when users repeatedly visit your page, but don't stick around to read what you've written, it becomes apparent that the page doesn't really satisfy the users.

[Read More Answers.](#)

Question # 58

What is content marketing?

Answer:-

Content marketing is an approach focused on creating and distributing valuable and meaningful content to attract and retain a fixed audience and, ultimately, to drive profitable customer actions.

[Read More Answers.](#)

[Read More Answers.](#)

Question # 66

Tell me what is Search Engine Submission?

Answer:-

Search engine submission refers to a specific activity of the web masters in which a website is directly submitted to the search engine so that its online recognition and visibility is increased.

In other words, it is one way of informing the search engines about the existence of any website, which is then indexed by the search engines and reflected on the SERP page.

This is also performed by the web developers and the SEO experts so that the search engines reflect the most recent content of the website.

The simple answer is: .

You don't need to submit your website to search engines.

The majority of search engines nowadays (Google, Bing and Yahoo) crawl and index pages by following links.

[Read More Answers.](#)

Question # 67

Explain me what are 404 errors?

Answer:-

404 errors are considered one of the most potential impediments in the way to successful SEO. When a specific URL is renamed or becomes non-existent, any links connecting to that URL would result in 404 errors.

Interesting thing is, Google does not penalize any website for 404 errors. However, if the search engines consistently fail to crawl the internal links of any website, the search ranking of that website is very likely to drop with low traffic.

[Read More Answers.](#)

Question # 68

Tell me why are backlinks important in SEO?

Answer:-

From the perspective of SEO, there is a difference between backlinks and quality backlinks.

For Google search, random backlinks do not offer any help. Google assesses the quality of the backlinks present on a webpage with the relevancy found in the content of both the web pages.

The higher is the relevance between the original content and backlink content, the greater becomes the quality of the backlinks.

[Read More Answers.](#)

Answer:-

The outbound links are a Links, from your website to another webpage or website.

[Read More Answers.](#)

Question # 73

What is RankBrain in SEO?

Answer:-

Launched by Google on 26th October 2015, RankBrain accounts for an Artificial Intelligence (AI) system which provides aid to Google to process its search queries through algorithm-learning program.

The uniqueness of this machine-learning technology lies in its effective management of search queries that are new to the Google search engine.

By converting the search language into vectors (mathematical codes), this AI system can conjecture what the users are trying to convey by exploring already recorded search phrases of similar meaning and filter search results accordingly without any manual help.

[Read More Answers.](#)

Question # 74

Explain differences between bounce rate and pogo sticking?

Answer:-

The difference between bounce rate and pogo sticking is:

A high bounce rate isn't always bad, as it can mean that while the visitor didn't travel deeper into a site, he spent some time on the page and got an answer to his question. He may have saved the URL or may come back later, but since he didn't spend more time reading the content, the activity is considered a bounce.

Pogo sticking occurs when a user performs a search, clicks on a result, very quickly clicks back to the search result page, and clicks on a different result. This type of behavior is a direct result of immediate dissatisfaction in the search result. This always has a negative aspect to it.

In simple words, pogo-sticking has to do with search engine traffic, while bounce rate is tied to all traffic sources including search.

[Read More Answers.](#)

Question # 75

Tell me what is Google's Rich Answer Box?

It aimed to increase the ranking of local listing in a search which also affects the search results shown in Google Maps along with the regular Google search results.

[Read More Answers.](#)

Question # 78

Tell me what is Google Algorithm?

Answer:-

Google algorithm is a set of commands written for the purpose of feeding back with search results relevant to the queries made. Google's algorithm does the work for you by searching out Web pages that contain the keywords you used to search, then assigning a rank to each page based on several factors, including how many times the keywords appear on the page, quality of the page etc. Google uses numerous other criteria that change periodically to deliver more relevant results.

[Read More Answers.](#)

Question # 79

Explain me what is Google PageRank?

Answer:-

Google PageRank was a calculative software which determined the relevancy of one web page based on the number of quality backlinks it contains. In other words, PageRank views backlinks as votes, which means if Page X links to Page Y, Page Y is voted by Page X. The job of PageRank is to interpret both the page content and find relevancy. The higher is the relevancy level, greater importance is ascribed to a certain page by Google which positively affects the organic result of that web page.

Currently Google doesn't use PageRank to rank a webpage. Google's John Mueller said Google probably won't update Toolbar PageRank in the future.

[Read More Answers.](#)

Question # 80

Please explain what is robots.txt?

Answer:-

Robots.txt is one way of telling the Search Engine Bots about the web pages on your website which you do not want them to visit.

Robots.txt is useful for preventing the indexation of the parts of any online content that website owners do not want to display.

IF you want to block all search engine robots from crawling your website, just put the follow code:

IF you want to block Google from crawling your website, just put the follow code:

It is important to decide the location of Robots.txt very carefully, or else errors might occur while displaying the website.

[Read More Answers.](#)

Question # 81

Do you know what is the definition of URL?

Answer:-

Uniform Resource Locator or URL acts as a generic term used to specify all kinds of web addresses found on the web.

URLs provide users with ways to identify and locate resources and documents on the web. URLs contain internet protocols, IP address of the host and the domain name along with other information.

[Read More Answers.](#)

Question # 82

Tell me what is "Google Suggest" or "Autocomplete"?

Answer:-

Google Suggest is a part of the auto-complete function of Google search engine. When any user enters a word or some letters over the search field, Google shows many associated terms to him/her in a drop down menu. Such suggestions are a collection of the most frequently search terms over the Google search engine.

[Read More Answers.](#)

Question # 92

Tell me what is Canonical URL?

Answer:-

Canonical URLs relate to the concept of selecting the best URL for the web pages that the visitors want to see. Also, known as canonical tags, these URLs help in content syndication when multiple versions of a same page become available over the Internet. Thus, it is used to resolve issues related to content duplication.

For example, most people would consider these the same urls:

www.globalguideline.com
globalguideline.com/
www.globalguideline.com/index.html
globalguideline.com/home.asp

But technically all of these urls are different.

[Read More Answers.](#)

Question # 93

Do you know what is 301 Redirect?

Answer:-

301 redirect is considered as one of the most effective ways of performing redirects on any website. When a web address has been changed permanently, it is best to use 301 redirects which will redirect all the users to the new web address.

With this redirect, the search engine passes all the values associated with the old website to the new website. Moreover, 301 redirect also pushes all the link juice to the new web address that keeps the ranking of the website unaffected.
